*The Color of Water Aug 28 2019 From the bestselling author of Deacon King Kong and the National Book Award-winning The Good Lord Bird: The modern classic that spent more than two years on The New York Times bestseller list and that Oprah.com calls one of the best memoirs of a generation. Who is Ruth McBride Jordan? A self-declared "light-skinned" woman evasive about her ethnicity, yet steadfast in her love for her twelve black children. James McBride, journalist, musician, and son, explores his mother's past, as well as his own upbringing and heritage, in a poignant and powerful debut, The Color Of Water: A Black Man's Tribute to His White Mother. The son of a black minister and a woman who would not admit she was white, James McBride grew up in "orchestrated chaos" with his eleven siblings in the poor, all-black projects of Red Hook, Brooklyn. "Mommy," a fiercely protective woman with "dark eyes full of pep and fire," herded her brood to Manhattan's free cultural events, sent them off on buses to the best (and mainly Jewish) schools, demanded good grades, and commanded respect. As a young man, McBride saw his mother as a source of embarrassment, worry, and confusion—and reached thirty before he began to discover the truth about her early life and long-buried pain. In The Color of Water, McBride retraces his mother's footsteps and, through her searing and spirited voice, recreates her remarkable story. The daughter of a failed itinerant Orthodox rabbi, she was born Rachel Shilsky (actually Ruchel Dwara Zylska) in Poland on April 1, 1921. Fleeing pogroms, her family emigrated to America and ultimately settled in Suffolk, Virginia, a small town where anti-Semitism and racial tensions ran high. With candor and immediacy, Ruth describes her parents' loveless marriage; her fragile, handicapped mother; her cruel, sexually-abusive father; and the rest of the family and life she abandoned. At seventeen, after fleeing Virginia and settling in New York City, Ruth married a black minister and founded the all-black New Brown Memorial Baptist Church in her Red Hook living room. "God is the color of water," Ruth McBride taught her children, firmly convinced that life's blessings and life's values transcend race. Twice widowed, and continually confronting overwhelming adversity and racism, Ruth's determination, drive and discipline saw her dozen children through college—and most through graduate school. At age 65, she herself received a degree in social work from Temple University. Interspersed throughout his mother's compelling narrative, McBride shares candid recollections of his own experiences as a mixed-race child of poverty, his flirtations with drugs and violence, and his eventual self-realization and professional success. The Color of Water touches readers of all colors as a vivid portrait of growing up, a haunting meditation on race and identity, and a lyrical valentine to a mother from her son.*

*The Color of Love Jun 18 2021 The Color Of Love reveals the power of racial hierarchies to infiltrate our most intimate relationships. Delving far deeper than previous sociologists have into the black Brazilian experience, Elizabeth Hordge-Freeman examines the relationship between racialization and the emotional life of a family. Based on interviews and a sixteen-month ethnography of ten working-class Brazilian families, this provocative work sheds light on how families simultaneously resist and reproduce racial hierarchies. Examining race and gender, Hordge-Freeman illustrates the privileges of whiteness by revealing how those with "blacker" features often experience material and emotional hardships. From parental ties, to sibling interactions, to extended family and romantic relationships, the chapters chart new territory by revealing the connection between proximity to whiteness and the distribution of affection within families. Hordge-Freeman also explores how black Brazilian families, particularly mothers, rely on diverse strategies that reproduce, negotiate, and resist racism. She frames efforts to modify racial features as sometimes reflecting internalized racism, and at other times as responding to material and emotional considerations. Contextualizing their strategies within broader narratives of the African diaspora, she examines how Salvador's inhabitants perceive the history of the slave trade itself in a city that is*

referred to as the “blackest” in Brazil. She argues that racial hierarchies may orchestrate family relationships in ways that reflect and reproduce racial inequality, but black Brazilian families actively negotiate these hierarchies to assert their citizenship and humanity.

*The Color of Light* Jun 30 2022 An emotionally moving novel of a woman in search of a new beginning and a man haunted by the past—from the New York Times bestselling author of the Tradd Street novels. At thirty-two, Jillian Parrish finally finds the courage to put herself in the driver’s seat of her life. Pregnant and recently divorced, she and her seven-year-old daughter find refuge and solace on Pawleys Island, South Carolina—Jillian’s only source of happy childhood memories. Summers spent at her grandmother’s beach house had been Jillian’s sanctuary from indifferent parents—until her best friend Lauren Mills disappeared, never to be found. Linc Rising, Lauren’s boyfriend and Jillian’s confidant, had been a suspect in Lauren’s disappearance. Jillian had never doubted his innocence—but because her parents had whisked her back home to Atlanta, she never got a chance to tell him. Now, a resentful Linc is back on Pawleys Island—renovating the old Mills house. And as ghosts of the past are resurrected, and as Jillian’s daughter begins having eerie conversations with an imaginary friend named Lauren, Jillian and Linc will uncover the truth about Lauren’s disappearance and about the feelings they have buried for sixteen years...

*The Color of the Land* Mar 28 2022 *The Color of the Land* brings the histories of Creek Indians, African Americans, and whites in Oklahoma together into one story that explores the way races and nations were made and remade in conflicts over who would own land, who would farm it, and who would rule it. This story disrupts expected narratives of the American past, revealing how identities--race, nation, and class--took new forms in struggles over the creation of different systems of property. Conflicts were unleashed by a series of sweeping changes: the forced "removal" of the Creeks from their homeland to Oklahoma in the 1830s, the transformation of the Creeks' enslaved black population into landed black Creek citizens after the Civil War, the imposition of statehood and private landownership at the turn of the twentieth century, and the entrenchment of a sharecropping economy and white supremacy in the following decades. In struggles over land, wealth, and power, Oklahomans actively defined and redefined what it meant to be Native American, African American, or white. By telling this story, David Chang contributes to the history of racial construction and nationalism as well as to southern, western, and Native American history.

*The Color Purple* May 18 2021 Winner of the Pulitzer Prize and the National Book Award, this novel about a resilient and courageous woman has become a Broadway show and a cultural phenomenon. A PBS Great American Read Top 100 Pick Celie has grown up poor in rural Georgia, despised by the society around her and abused by her own family. She strives to protect her sister, Nettie, from a similar fate, and while Nettie escapes to a new life as a missionary in Africa, Celie is left behind without her best friend and confidante, married off to an older suitor, and sentenced to a life alone with a harsh and brutal husband. In an attempt to transcend a life that often seems too much to bear, Celie begins writing letters directly to God. The letters, spanning twenty years, record a journey of self-discovery and empowerment guided by the light of a few strong women. She meets Shug Avery, her husband’s mistress and a jazz singer with a zest for life, and her stepson’s wife, Sophia, who challenges her to fight for independence. And though the many letters from Celie’s sister are hidden by her husband, Nettie’s unwavering support will prove to be the most breathtaking of all. *The Color Purple* has sold more than five million copies, inspired an Academy Award-nominated film starring Oprah Winfrey and directed by Steven Spielberg, and been adapted into a Tony-nominated Broadway musical. *The Republic of Color Oct 11 2020 The Republic of Color delves deep into the history of color science in the United States to unearth its origins and examine the scope of its influence on the industrial transformation of turn-of-the-century America. For a nation in the grip of profound economic, cultural, and demographic crises, the standardization of color became a means of social reform—a way of sculpting the American population into one more amenable to the needs of the emerging industrial order. Delineating color was also a way to characterize the vagaries of human nature, and to create ideal structures through which those humans would act in a newly modern American republic. Michael Rossi’s compelling history goes far beyond the culture of the visual to show readers how the control and regulation of color shaped the social contours of modern America—and redefined the way we see the world.*

*The Color of Food Sep 21 2021 “Anyone who eats should read this book: You will come to the table with new appreciation for the intersections between race and food . . . powerful.”—Anna Lappé, author of Diet for a Hot Planet The growing trend of organic farming and homesteading is changing the way the farmer is portrayed in mainstream media, and yet, farmers of color are still largely left out of the picture. The Color of Food seeks to rectify this. By recognizing the critical issues that lie at the intersection of race and food, this stunning collection of portraits and stories challenges the status quo of agrarian identity. Author, photographer, and biracial farmer Natasha Bowens’ quest to explore her own roots in the soil leads her to unearth a larger story, weaving together the seemingly forgotten history of agriculture for people of color, the issues they face today, and the culture and resilience they bring to food and farming. The Color of Food teaches us that the food and farm movement is about more than buying local and protecting our soil. It is about preserving culture and community, digging deeply into the places we’ve overlooked, and honoring those who have come before us. Blending storytelling, photography, oral history, and unique insight, these pages remind us that true food sovereignty means a place at the table for everyone. “Natasha Bowens, through her compelling stories and powerful images of a rainbow of farmers, reminds us that the industrialization of our food system and the oppression of our people—two sides of the same coin—will, if not confronted, sow the seeds of our own destruction.”—Mark Winne, author of Food Town, USA*

Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's The Color of Law offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), The Color of Law forces us to face the obligation to remedy our unconstitutional past.*

*The Color of Mind Feb 01 2020 American students vary in educational achievement, but white students in general typically have better test scores and grades than black students. Why is this the case, and what can school leaders do about it? In The Color of Mind, Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins. Telling the story of what they call the Color of Mind—the idea that there are racial differences in intelligence, character, and behavior—they show how philosophers, such as David Hume and Immanuel Kant, and American statesman Thomas Jefferson, contributed to the construction of this pernicious idea, how it influenced the nature of schooling and student achievement, and how voices of dissent such as Frederick Douglass, Frances Ellen Watkins Harper, and W. E. B. Du Bois debunked the Color of Mind and worked to undo its adverse impacts. Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences, Darby and Rury uncover the historical interplay between ideas about race and American schooling, to show clearly that the racial achievement gap has been socially and institutionally constructed. School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools, while still doing what they can to mitigate the negative effects of poverty, segregation, inequality, and other external factors that adversely affect student achievement. While we cannot expect schools alone to solve these vexing social problems, we must demand that they address the dignitary injustices associated with how we track, discipline, and deal with special education that reinforce long-standing racist ideas. That is the only way to expel the Color of Mind from schools, close the racial achievement gap, and afford all children the dignity they deserve.*

*What Color Is the Sacred? Jun 26 2019 Over the past thirty years, visionary anthropologist Michael Taussig has crafted a highly distinctive body of work. Playful, enthralling, and whip-smart, his writing makes ingenious connections between ideas, thinkers, and things. An extended meditation on the mysteries of color and the fascination they provoke, What Color Is the Sacred? is the next step on Taussig's remarkable intellectual path. Following his interest in magic and surrealism, his earlier work on mimesis, and his recent discussion of heat, gold, and cocaine in My Cocaine Museum, this book uses color to explore further dimensions of what Taussig calls "the bodily unconscious" in an age of global warming. Drawing on classic ethnography as well as the work of Benjamin, Burroughs, and Proust, he takes up the notion that color invites the viewer into images and into the world. Yet, as Taussig makes clear, color has a history—a manifestly colonial history rooted in the West's discomfort with color, especially bright color, and its associations with the so-called primitive. He begins by noting Goethe's belief that Europeans are physically averse to vivid color while the uncivilized revel*

*in it, which prompts Taussig to reconsider colonialism as a tension between chromophobes and chromophiliacs. And he ends with the strange story of coal, which, he argues, displaced colonial color by giving birth to synthetic colors, organic chemistry, and IG Farben, the giant chemical corporation behind the Third Reich. Nietzsche once wrote, "So far, all that has given colour to existence still lacks a history." With What Color Is the Sacred? Taussig has taken up that challenge with all the radiant intelligence and inspiration we've come to expect from him.*

By emphasizing color's materiality, and how it was produced, exchanged and used, contributors draw attention to the disjuncture between the beauty of color and the blood, sweat, and tears that went into its production, circulation and application as well as to the complicated and varied social meanings attached to color within specific historical and social contexts.*

*Color Theory Feb 24 2022 In depth demonstrations teach how to interpret the basic shapes of the head and facial features. Everyone who paints or draws portraits worries most about one thing: getting an accurate likeness. But getting a likeness doesn't take genius and isn't based on a bag of tricks. It's really a matter of learning to use a logical procedure, based on careful observation of the subject, and then lots of practice. Drawing a Likeness is divided into three parts. In the first part you learn how to analyze a head--how to recognize the basic shapes and their variations, and place the features within the larger form of the head. Drawings of many different subjects serve as examples. In the second part, the actual drawing procedure is analyzed in minute detail as three different-shaped heads--oval, rectangular, and round--are drawn. Each of these three demonstrations contains a photograph of the subject and develops the portrait in great detail (45 actual steps) right down to the finished drawing. In the third part of the book, you learn how to use different combinations of drawing materials to create a wide range of effects: charcoal, Conté, and carbon pencils on both gray and white charcoal paper, graphite pencils on illustration board, soft and hard charcoal sticks and pencils on smooth board, charcoal and carbon pencil worked over acrylic-gessoed chipboard. There are six demonstrations in this section showing how to draw men and women of different ages. Each demonstration has ten steps, one per page, and includes a photograph of the subject. Drawing a Likeness is a basic, practical book for anyone who has ever tried to draw or paint a portrait--students, amateurs, professionals, and teachers.*

*Green Apr 04 2020 In this beautiful and richly illustrated book, the acclaimed author of Blue and Black presents a fascinating and revealing history of the color green in European societies from*

*prehistoric times to today. Examining the evolving place of green in art, clothes, literature, religion, science, and everyday life, Michel Pastoureau traces how culture has profoundly changed the perception and meaning of the color over millennia—and how we misread cultural, social, and art history when we assume that colors have always signified what they do today. Filled with entertaining and enlightening anecdotes, Green shows that the color has been ambivalent: a symbol of life, luck, and hope, but also disorder, greed, poison, and the devil. Chemically unstable, green pigments were long difficult to produce and even harder to fix. Not surprisingly, the color has been associated with all that is changeable and fleeting: childhood, love, and money. Only in the Romantic period did green definitively become the color of nature. Pastoureau also explains why the color was connected with the Roman emperor Nero, how it became the color of Islam, why Goethe believed it was the color of the middle class, why some nineteenth-century scholars speculated that the ancient Greeks couldn't see green, and how the color was denigrated by Kandinsky and the Bauhaus. More broadly, Green demonstrates that the history of the color is, to a large degree, one of dramatic reversal: long absent, ignored, or rejected, green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet. With its striking design and compelling text, Green will delight anyone who is interested in history, culture, art, fashion, or media.*

*Blue May 30 2022 A beautifully illustrated visual and cultural history of the color blue throughout the ages Blue has had a long and topsy-turvy history in the Western world. The ancient Greeks scorned it as ugly and barbaric, but most Americans and Europeans now cite it as their favorite color. In this fascinating history, the renowned medievalist Michel Pastoureau traces the changing meanings of blue from its rare appearance in prehistoric art to its international ubiquity today. Any history of color is, above all, a social history. Pastoureau investigates how the ever-changing role of blue in society has been reflected in manuscripts, stained glass, heraldry, clothing, paintings, and popular culture. Beginning with the almost total absence of blue from ancient Western art and language, the story moves to medieval Europe. As people began to associate blue with the Virgin Mary, the color became a powerful element in church decoration and symbolism. Blue gained new favor as a royal color in the twelfth century and became a formidable political and military force during the French Revolution. As blue triumphed in the modern era, new shades were created and blue became the color of romance and the blues. Finally, Pastoureau follows blue into contemporary times, when military clothing gave way to the everyday uniform of blue jeans and blue became the universal and unifying color of the Earth as seen from space. Beautifully illustrated, *Blue* tells the*

*Color Psychology: Profit From The Psychology of Color: Discover the Meaning and Effects of Color Nov 11 2020 Color Psychology: Profit From The Psychology of Color: Discover the Meaning and Effect of Colors The book "Color Psychology" explains the different psychological effects that different colors have on the human mind. Color consultants believe that the colors used in the design of any object or environment (e.g. a website) can have a significant impact on the emotions and performance of people within that environment and that people respond, even at a psychological level, to colors. Based upon fundamentals in Color Psychology, with years of research by color psychologists, the characteristics of certain colors have been identified to cause an emotional response in people. This was done by studying the response from hundreds of thousands of test subjects around the world in order to isolate how certain colors make us feel. What You'll Learn: How Color Can Improve Your Bottom Line How Color Can Affect People's Emotions Which Colors Suit Your Target Market Which Are The "Magic" Colors Which Color makes Shoppers Spend More And Much, Much More... The effect that color has on human emotions can be profound. Researchers have studied the biological perception of color, the relationships between color and emotion, and how different colors can be used to affect mood and behavior in predictable ways. Although The Psychology of Color is a relatively new area of scientific research, ancient civilizations believed in the influence of color on humans; the ancient Chinese, Egyptians, and Indians believed in chromotherapy. The Future Use of The Psychology of Color... Case Study: With world-renowned Spanish chef, Ferran Adria, he focused on the color of the crockery. Guests sat down one side of a large table were given a pink strawberry dessert on a white plate. Down the other side of the table guests ate an identical dessert from a black plate. Those eating from the white plates rated the dessert as 10% sweeter than those who ate from the black plates. Subsequent experiments have shown that*

*introducing a square or angular plate intensifies the difference, with roundness accentuating sweetness. "Clearly contextual perception is a big opportunity." Johannes Le Coultre, a perception physiologist with Nestle. Who is This Book For? Anyone interested in the influence of color will get something from this book. However, primarily I wrote this book as a guide for all Internet Business People, Marketers and Entrepreneurs because I think it's essential that we all understand the psychological influence of color. Changing the colors on your sales page or website won't suddenly bring in millions of dollars but there is no doubt that a change of color may well result in a change of mood in the viewer; it's how you use that power that can determine your profitability. The challenge for you as an Internet Business Person, Marketers or Entrepreneur is to understand the theories of color and to use them in a profitable but professional and ethical way. People Who Read This Book: "I was blown away by the information. Great book." Jonathan Smith, WealthCrave.com "I can heartily recommend this Book. The book describes the emotional reactions that people may be expected to evince, based on considerable research by psychologists." David J. Linden, BizWebTX.com "It's fascinating to see the way that certain institutions use these colors in order to influence people." George Cuthbert, TheCopywritingRevolution.com "Know exactly what color combinations you will need to use on your site." Jeff Gibson, Mr. Affiliate. "Good read, I recommend it." Kaan Bimplis (Neurophysicist & Licensed NLP Trainer) NLP Istanbul.com NB: "Color Psychology" - color theory, color and design, and psychology of color and design.*
