The Clergyman's Obligations Considered Feb 23 2020

Against Obligation Aug 11 2021 Do citizens of a nation such as the United States have a moral duty to obey the law? Do officials, when interpreting the Constitution, have an obligation to follow what that text meant when ratified? To follow precedent? To follow what the Supreme Court today says the Constitution means? These are questions of political obligation (for citizens) and interpretive obligation (for anyone interpreting the Constitution, often officials). Abner Greene argues that such obligations do not exist. Although citizens should obey some laws entirely, and other laws in some instances, no one has put forth a successful argument that citizens should obey all laws all the time. Greene's case is not only "against" obligation. It is also "for" an approach he calls "permeable sovereignty": all of our norms are on equal footing with the state's laws. Accordingly, the state should accommodate religious, philosophical, family, or tribal norms whenever possible. Greene shows that questions of interpretive obligation share many qualities with those of political obligation. In rejecting the view that constitutional interpreters must follow either prior or higher sources of constitutional meaning, Greene confronts and turns aside arguments similar to those offered for a moral duty of citizens to obey the law.

SEBI Listing Obligations and Disclosure Requirements – A Handbook, 1e Jun 09 2021 About the book The book provides detailed analysis of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 which replaced the Listing Agreement and were notified on 2nd September 2015. These Regulations impose considerable volume of compliance obligations on listed entities and every listed entity is obligated to comply with them. The volume of the Regulations and the pace at which they have been undergoing frequent changes makes the task of compliance a hard one for the compliance officers. This book attempts to simplify the complex mass of the Regulations and bring in the relevant provisions of the Companies Act, 2013 so as to assist the compliance officers in their task of compliance. These Regulations apply to the listed entity who has listed any of the following designated securities on recognised stock exchange(s): (a) Specified securities listed on main board or SME exchange or institutional trading platform; (b) Non-convertible debt securities, non-convertible redeemable preference shares, perpetual debt instrument, perpetual non-cumulative preference shares; (c) Indian depository receipts; (d) Securitised debt instruments; (e) Security receipts; (f) Units issued by mutual funds; (g) Any other securities as may be specified by the Board. It would be immensely useful for Company Secretaries, Law professionals & Chartered Accountants. Key highlights Covering detailed analysis of provisions applicable for listing of specified securities on recognized stock exchange(s). Topics have been thoroughly explained using

judicial pronouncements.

The Law of Trusts and Equitable Obligations Dec 03 2020 The Law of Trusts and Equitable Obligations provides students with a detailed and stimulating account of the law of equity and trusts. The fifth edition has been thoroughly updated by Warren Barr, senior lecturer at the University of Liverpool and Law Teacher of the Year 2006 in collaboration with Robert Pearce and John Stevens.

God and Moral Obligation May 08 2021 Is there a connection between religion and morality? Ivan Karamazov, in Dostoevsky's *The Brothers Karamazov*, famously declares that if God does not exist, then "everything is permitted." Most philosophers reject such a view and hold that moral truths do not depend on God. C. Stephen Evans argues that the truth lies somewhere between these two claims. It is not quite right to say that there would be nothing left of morality if God did not exist, but moral obligations do depend on God ontologically. Such obligations are best understood as God's commands or requirements, communicated to humans in a variety of ways, including conscience. In *God and Moral Obligation*, Evans also argues that two views often thought to be rivals to a divine command morality, natural law ethics and virtue ethics, are not rivals at all but provide necessary complementary elements of a comprehensive morality. A number of objections to a divine command account of moral obligations are posed and answered. In the concluding chapters Evans points out the advantages such an account has over secular rivals. The authority and objectivity of moral obligations are best explained by seeing them as divine commands.

Corporate Obligations under International Law May 20 2022 This book examines the extent to which international law places obligations directly on corporate entities. It is often argued that corporations are bound by, inter alia, the same human rights and environmental obligations that states have. This book examines the source of these supposed obligations in treaty law, international custom, and in internationalized contracts, to determine whether they really can be transposed to corporations so easily. The focus of the book is on the regulation by international law of private corporate conduct. It examines whether corporate obligations, namely obligations binding directly upon a corporation under positive international law, have indeed emerged, and if so, whether corporations may be systemically included in the predominantly state-centric framework of international law. It investigates the challenges facing international law as a result of the potential emergence of corporate obligations, and engages in a structural analysis of what corporate obligations under international human rights law might entail. Ultimately, it warns against conceptualizing corporations as both holders and potential violators of human rights, explaining why they are not automatically bound by the same obligations that are imposed on states.

The Financial Obligation in International Law Mar 18 2022 This is the first volume to comprehensively and systematically study, describe, and theorize the financial obligation created and governed by public international law. Legal globalization has given rise to a number of financial issues in international law in areas as diverse as development financing, investment protection, compensation of human rights victims, and sovereign debt crises. The claims resulting from the proliferation of financial activity are not limited to those primarily involving financial obligation (e.g. loans and grants) but include secondary obligation resulting from the law on international responsibility. Among the many instances of financial obligation covered in this study, the reader will find inter-State financial transactions, inter-State sale of goods, transnational services such as telecommunications and post, the financial operations of multilateral institutions, loans, grants and guarantees provided by the various international financial institutions, certain financial relations between non-State actors (including natural persons) and States, intergovernmental organizations or other international legal actors, and government loans to international organizations. Rich in historical detail and systematic in its coverage of contemporary law, this book will be valued by all practitioners and scholars with an interest in the nature of international financial obligation.

Comparative Law of Obligations Jun 16 2019 This comprehensive book provides a comparative overview of legal institutions that intersect with everyday life: contracts, unilateral legal transactions, torts, negotiorum gestio and unjust enrichment. These institutions form the core of the Law of Obligations, which is examined in this book from the perspective of all major legal traditions including Civil, Common, Islamic and Chinese law.

A Treatise on the Law of Obligations Or Contracts Dec 23 2019 Of this edition Marvin speaks highly of Evans: "His notes are comprehensive and learned, and deserve a careful perusal in connexion with the text, and he is entitled to considerable praise for having furnished Pothier on Obligations to the profession in so good and accurate an English garb." Marvin, *Legal Bibliography* 578. Holdsworth agrees: "He helped to make English lawyers acquainted with Pothier's work, and, by so doing, did considerable service to the development of the English law of contract..." Holdsworth, *A History of English Law* XIII:467. Evans [1767-1821] was a scholarly English lawyer. To Pothier's work he added an Appendix on several topics of English law, organized as a treatise on the law of evidence. Pothier's treatise on civil law was "... soon recognized as a major contribution to legal science, translated by Evans and frequently cited in British Courts." Walker,

Oxford Companion to Law 973. Reprint of the uncommon Evans translation, the English second edition which followed the American edition of 1802 (translated by F.X. Martin), which is also available as a facsimile reprint published by The Lawbook Exchange, Ltd.

Defining Rape: Emerging Obligations for States Under International Law? Feb 17 2022 The crime of rape has been prevalent in all contexts, whether committed during armed conflict or in peacetime, and has largely been characterised by a culture of impunity. International law, through its branches of international human rights law, international humanitarian law and international criminal law, has increasingly condemned such violence and is progressively obliging states to prevent rape, whether committed by a state agent or a private actor.

Reforming the French Law of Obligations Jun 21 2022 The 2005 Avant-projet de réforme du droit des obligations et de la prescription, also dubbed the Avant-projet Catala, suggests the most far-reaching reform of the French Civil code since it came into force in 1804. It reviews central aspects of contract law, the law of delict and the law of unjustified enrichment. There is currently a very lively debate in France as to the merits or the demerits of both the particular draft provisions and the general idea of recodification as such. This volume is the first publication to introduce the reform proposals to an English speaking audience. It contains the official English translation of the text, and distinguished private lawyers from both England and France analyse and assess particularly interesting aspects of the substantive draft provisions in a comparative perspective. Topics covered include negotiation and renegotiation of contracts, la cause, the enforcement of contractual obligations, termination of contract and its consequences, the effects of contracts on third parties, the definition of la faute, the quantification of damages, and the law of prescription. The volume also contains an overall assessment of the draft provisions by one of the most senior French judges who chaired the Working Party on the Avant-projet, established by the French Supreme Court, the Cour de cassation. The book is indispensable for comparative private lawyers and lawyers with a particular interest in French law. It is also of use to all private lawyers (both academics and practitioners) looking for information on recent international and European trends in contract and tort.

Human Rights Obligations of Non-State Actors Mar 06 2021 The threats to human rights posed by non-state actors are of increasing concern. Human rights activists increasingly address the activity of multinational corporations, the policies of international organizations such as the World Bank and the World Trade Organization, and international crimes committed by entities such as armed opposition groups and terrorists. This book presents an approach to human rights that goes beyond the traditional focus on states and outlines the human rights obligations of non-state actors. Furthermore, it addresses some of the ways in which these entities can be held legally accountable for their actions in various jurisdictions. The political debate concerning the appropriateness of expanding human rights scrutiny to non-state actors is discussed and dissected. For some, extending human rights into these spheres trivializes human rights and allows abusive governments to distract us from ongoing violations. For others such an extension is essential if human rights are properly to address the current concerns of women and workers. The main focus of the book, however, is on the legal obligations of non-state actors. The book discusses how developments in the fields of international responsibility and international criminal law have implications for building a framework for the human rights obligations of non-state actors in international law. In turn these international developments have drawn on the changing ways in which human rights are implemented in national law. A selection of national jurisdictions, including the United States, South Africa and the United Kingdom are examined with regard to the application of human rights law to non-state actors. The book's final part includes suggestions with regard to understanding the parameters of the human rights obligations of non-state actors. Key to understanding the legal obligations of non-state actors are concepts such as dignity and democracy. While neither concept can unravel the dilemmas involved in the application of human rights law to non-state actors, a better understanding of the tensions surrounding these concepts can help us to understand what is at stake.

Cases Determined in the Supreme Court of the State of Oklahoma Oct 01 2020

Law, Obligation, Community Aug 23 2022 Against an ever-expanding and diversifying 'rights talk', this book re-opens the question of obligation from not only legal but also ethical, sociological and political perspectives. Its premise is that obligation has a primacy ahead of rights, because rights attach to practices and modes of being that are already saturated with obligations. Obligations thus lie at the core not just of law but of community. Yet the distinctive meanings, range and situations of obligation have tended to remain under-theorised in legal scholarship. In response, this book examines the sense in which we are multiply 'bound beings', to law and legal institutions, as much as we are to place, community, memory and the various social institutions that give shape to collective life. Sharing this set of concerns, each of the international group of scholars contributing to this volume traces the specificity of the binding force of obligations, their techniques and modes of expression, as well as their centrally important role in giving form to lawful relations. Together they provide an innovative and challenging contribution to legal scholarship: one that will also be of relevance to those working in politics, philosophy and social theory.

Measuring Damages in the Law of Obligations Jun 28 2020 This book challenges certain differences between contract, tort and equity in relation to the measure (in a broad sense) of damages. Damages are defined as the monetary award made by a court in consequence of a breach of contract, a tort or an equitable wrong. In all these causes of action, damages usually aim to put the claimant into the position the claimant would be in without the wrong. Even though the main objective of damages is thus the same for each cause of action, their measure is not. While some aspects of the measure of damages are more or less harmonised between contract, tort and equity (e.g. causation in fact and mitigation), significant differences exist in relation to (1) remoteness of damage, which is the question of whether, when and to which degree damage needs to be foreseeable to be recoverable; (2) the compensability of non-pecuniary loss such as pain and suffering, distress and loss of reputation; (3) the effect of contributory negligence, which is the victim's contribution to the occurrence of the wrong or the ensuing loss through unreasonable conduct prior to the wrong; (4) the circumstances under which victims of wrongs can claim the gain the wrongdoer has made from the wrong; and (5) the availability and scope of exemplary (or punitive) damages. For each of the five topics, this book examines the present position in contract, tort and equity and establishes the differences between the three areas. It goes on to scrutinise the arguments in defence of existing differences. The conclusion on each topic is that the present differences between contract, tort and equity cannot be justified on merits and should be removed through a harmonisation of the relevant principles.

The Development of Positive Obligations under the European Convention on Human Rights by the European Court of Human Rights Jan 24 2020 During the last thirty years the European Court of Human Rights has been developing, at an expanding pace, positive obligations under the European Convention. This monograph seeks to provide a critical analysis of the burgeoning case law concerning positive obligations, a topic which is relatively uncharted in the existing literature. Positive obligations require many different forms of action by member states, ranging from effectively investigating killings through to protecting peaceful demonstrators from violent attacks by their opponents. The contemporary significance of these obligations is graphically illustrated by the fact that it is the obligation upon states to provide fair trials to determine civil and criminal proceedings within a reasonable time that is the source of the overwhelming majority of complaints to the European Court in recent years. The study examines the legal bases and content of key positive obligations. Conclusions are then drawn concerning the reasons for the development of these obligations and areas of potential expansion are identified.

Enforcing Obligations Erga Omnes in International Law Dec 15 2021 The concept of obligations erga omnes - obligations to the international community as a whole - has fascinated international lawyers for decades, yet its precise implications remain unclear. This book assesses how this concept affects the enforcement of international law. It shows that all States are entitled to invoke obligations erga omnes in proceedings before the International Court of Justice, and to take countermeasures in response to serious erga omnes breaches. In addition, it suggests ways of identifying obligations that qualify as erga omnes. In order to sustain these results, the book conducts a thorough examination of international practice and jurisprudence as well as the recent work of the UN International Law Commission in the field of State responsibility. By so doing, it demonstrates that the erga omnes concept is solidly grounded in modern international law, and clarifies one of the central aspects of the international regime of law enforcement.

Obligations Sep 12 2021 *Obligations: Law and Language* is the first work of its kind to examine in depth the fundamental language used by courts, legislators, and academic commentators when describing the nature of obligations law. A comparative perspective is taken, examining the law of England, Scotland, the United States, Canada, and Australia, and an in-depth analysis is provided of the major legal commentaries, statutes, and case law from each jurisdiction. In exploring such fundamental words as obligation, liability, debt, conditional, unilateral, mutual, and gratuitous, the author examines the often confusing and contradictory ways in which basic structural language has been used, and brings clarity to a core area of legal theory and practice.

Information Rights and Obligations Nov 14 2021 Information requirements have become a key element of consumer policy at the European level and are also gaining increasing importance in all other areas of private law. The law stipulates that information provided should not be misleading and also involves requirements regarding the fairness and objectivity of what has been provided. In addition to controlling the veracity of what is voluntarily offered by traders, the law increasingly requires disclosure of certain information. This volume focuses especially on the question of how these information requirements influence the party autonomy. International contributors explore in various contexts whether the legislative policy regarding the information requirements and their relationship to party autonomy has been properly thought through.

On Political Obligation Sep 24 2022 First published in 1990. The individual's obligation to obey the law, the state and the government is a fundamental part of contemporary political theory. The contributors to this volume, drawn from a variety of disciplines including philosophy, political science and law, take a fresh look at the dilemmas of political obligation. They

discuss the extent to which we should allow the need for conformity to override individual liberties, and ask whether individualism is indeed feasible without a highly developed sense of the 'public interest' or the 'common good'. The contrast between individualism and communitarianism is examined throughout the book. The contributors also look at the various means through which the state can coerce or persuade the individual to be obedient. The emphasis throughout this collection is on the substantive problems themselves, rather than on the way these issues have been addressed in the history of political thought. The book offers a number of different perspectives on political obligation, and will be valuable to students of moral, political, social and legal philosophy.

Des obligations naturelles en droit Romain May 28 2020

Moral Principles and Political Obligations Mar 26 2020 Outlining the major competing theories in the history of political and moral philosophy--from Locke and Hume through Hart, Rawls, and Nozick--John Simmons attempts to understand and solve the ancient problem of political obligation. Under what conditions and for what reasons (if any), he asks, are we morally bound to obey the law and support the political institutions of our countries?

The Positive Obligations of the State Under the European Convention of Human Rights Apr 26 2020 The system of the European Convention of Human Rights imposes positive obligations on the state to guarantee human rights in circumstances where state agents do not directly interfere. In addition to the traditional/liberal negative obligation of non-interference, the state must actively protect the human rights of individuals residing within its jurisdiction. The liability of the state in terms of positive obligations induces a freestanding imperative of human rights that changes fundamentally the perception of the role of the state and the participatory ability of the individual, who can now assert their human rights in all circumstances in which they are relevant. In that regard, positive obligations herald the most advanced review of the state's business ever attempted in international law. The book undertakes a comprehensive study of positive obligations: from establishing the legitimacy of positive obligations within the system of the Convention to their practical implementation at the national level. Analysing in depth legal principles that pervade the whole system of the Convention, a coherent methodological framework of critical stages and parameters is provided to determine the content of positive obligations in a consistent, predictable and realistic manner. This study of the Convention explains and critically analyses the state's positive obligations, as imposed by the European Court of Human Rights, and sets out original proposals for their future development. The book will be of interest to those who study, research or practice public law, civil rights and liberties or international/European human rights law.
