Neither Plain Nor Simple Mar 04 2020 Canterbury Shaker Village, located in Canterbury, New Hampshire, just northeast of Concord, has seen more archeological research than any other Shaker community. David R. Starbuck has been digging there for over a quarter of a century. Beginning in 1978, Starbuck and his team mapped some 600 acres of the village, preparing sixty-one base maps, as well as dozens of drawings of foundations and mill features. Accompanying the maps were several hundred archeological site reports describing the history and present condition of every field, dump, foundation, wall, path, and orchard within the community. These documents offered the first comprehensive look at both the built and natural environment of any Shaker village. This above-ground study—with much updating—forms the second part of this volume. Through the 1980s, grant funding was available chiefly for above-ground recording and only rarely for excavating. Still, from the beginning Starbuck and his team speculated about what types of unexpected artifacts might be found if excavations were conducted in the Shaker dumps or in the nicely-manicured lawns behind the village's communal dwellings. With the 1992 death of Sister Ethel Hudson, the community's last surviving member, it seemed clear that Canterbury Shaker Village represented an unparalleled opportunity to use archeology as a cross-check on surviving nineteenth-century historical records and visitors' accounts. The Canterbury Shakers constitute one of the very best test cases for historical archeology precisely because they were a society that tightly controlled their internal descriptions of themselves. Because we know what the Shakers expected of themselves, we can use excavations to determine whether they actually lived up to their own ideals. Excavations into various dumps began in 1994. In the Second Family blacksmith shop foundation, for example, Starbuck discovered thousands of pipe wasters—evidence that the Canterbury Shakers manufactured red earthenware tobacco pipes for sale to the World's People. The Shakers' hog house contained numerous ceramics and glass bottles; at another dump almost a hundred stoneware bottles for beer or ginger beer were unearthed along with whisky flasks, perfume bottles, and false teeth. These new artifacts contradict the popular image of the Shakers as plain, simple, and otherworldly, thereby challenging existing paradigms about the nature of Shaker society. Starbuck's findings suggest that Shaker consumption practices were highly complex and that Shakers were perhaps more "human" than previously imagined. Neither Plain nor Simple, which brings together the original site maps with his most recent findings, will serve as the definitive archeological investigation of the Canterbury Shakers and their lifeways, and function as a model for similar archeological studies of communal societies.

Horse-Powered Farming for the 21st Century May 18 2021 Now is a time of exciting new developments for live animal power. As the numbers of adherents to this way of life grow, ecologically minded farmers in their fields are developing efficient horse-drawn systems, and equipment manufacturers in small shops all across North America and Europe are coming forth with new innovations in ground-drive technology that have us poised on the cusp of another agricultural revolution—with working horses, mules, donkeys, and oxen at the heart of it. --Publisher

Never Take Advice from an Unscarred Man Feb 01 2020 In his new collection of short stories, author Dennis Kolb shares the wisdom that came laced with the bumps and bruises he earned along the way through his life. From hunting for whitetail deer to the challenges of looking for a job after leaving the navy, Kolb shares funny moments and challenging times with wit and humor. He knew he needed to be willing to make the mistakes and happily take his lumps as he journeyed toward his goal—a life well-lived. Along the way, he imparts his own brand of wisdom—for example, you can't reason with animals or machines, and sometimes repeating the same action gets different results. He knows about humiliation, and he knows about success; he also knows that timing is everything! In *Never Take Advice from an Unscarred Man*, Kolb recalls his time as a small kid through the last half of the forties, his crazy teen years, his life in the navy, and beyond. The educational bruises and mistakes Kolb recounts have had far more influence on his happiness and success than any formal education could have. In these charming, homespun stories, he offers memories of times past for all to experience and enjoy.
