Reforming Juvenile Justice Mar 05 2020 Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks. Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

A Nation at Risk: The Imperative for Educational Reform (A Report to the Nation and the Secretary of Education) Oct 31 2019 Presents the report "A Nation at Risk: The Imperative for Educational Reform," provided by the National Commission on Excellence in Education. Includes findings and recommendations about the U.S. educational system. Lists members of the Commission and includes the Commission's charter and a schedule of its events. Contains commissioned papers, hearing testimony, and other presentations to the Commission. Offers information on notable programs and lists acknowledgments. Provides information on ordering the printed version and offers access to an ASCII version of the document for downloading. Links to the U.S. Department of Education home page and related publications.

New Directions in the World Economy Aug 22 2021 An attempt to assist policy-makers in developing countries to cope with the challenges they face during the rest of the century and beyond. For this purpose it provides information on the experience of developing, developed and socialist countries.

India's Living Constitution Jul 21 2021 An examination of the ideas, practices and controversies surrounding the Indian Constitution.

An Essay on Crimes and Punishments Oct 04 2022 Reprint of the fourth edition, which contains an additional text attributed to Voltaire. Originally published anonymously in 1764, Dei Delitti e Delle Pene was the first systematic study of the principles of crime and punishment. Infused with the spirit of the Enlightenment, its advocacy of crime prevention and the abolition of torture and capital punishment marked a significant advance in criminological thought, which had changed little since the Middle Ages. It had a profound influence on the development of criminal law in Europe and the United States.

The Life and Economics of David Ricardo Oct 24 2021 John P. Henderson's The Life and Economics of David Ricardo represents the first comprehensive personal and intellectual biography of the brilliant and influential British economist. Employing the talents of both a biographer and an economist, the author examines Ricardo's early years, his Sephardic origins and his employment in the London financial markets, as well as his later work on money and banking, international trade, economic instability and the theory of rent and value.

Henderson also provides a thorough investigation of Ricardo's relationships with Thomas Robert Malthus and other classical economists. The Life and Economics of David Ricardo will be of interest not only to historians of economic thought and students of economics, but also to any economist working in the Ricardian or Classical Political Economy tradition.

How to Reform Capitalism Oct 12 2020 A revolutionary, yet utterly practical blueprint for a wiser and better kind of capitalism.

The Meaning of Democracy and the Vulnerability of Democracies Dec 26 2021 Considers the social requirements for a thriving democracy

After the Reformation Jan 03 2020 Civilization and madness; community and class; bureaucracy, corruption, and revolution—these essays range from social history to political history and the history of ideas. All take a strong interpretive stand in the manner of the man to whom they are dedicated. Together they make a major contribution to the scholarship on sixteenth-century and seventeenth-century Europe. In the presentation of these original essays, it is justly noted that J. H. Hexter served as the conscience of his fellow scholars for over thirty years—a distinguished tribute accompanied by the best work by the best people in the field. Former students are among the contributors, as are some of J. H. Hexter's colleagues and friends, including two that he frequently engaged in debate, Geoffrey Elton and Lawrence Stone. Born in Memphis, Tennessee, J. H. Hexter received his B.A. degree from the University of Cincinnati and his Ph.D. degree from Harvard University. From 1939 to 1957 he taught at Queens College, CUNY. He then spent seven years as a member of the faculty of Washington University, to which he returned on his retirement from Yale University; where he taught from 1964 to 1978. Among his numerous awards are two Guggenheim Fellowships, a Fulbright Fellowship, a fellowship from the Ford Foundation and one from the Institute for Advanced Study.

Slaying Goliath Sep 10 2020 From one of the foremost authorities on education in the United States, Slaying Goliath is an impassioned, inspiring look at the ways in which parents, teachers, and activists are successfully fighting back to defeat the forces that are trying to privatize America's public schools. Diane Ravitch writes of a true grassroots movement sweeping the country, from cities and towns across America, a movement dedicated to protecting public schools from those who are funding privatization and who believe that America's schools should be run like businesses and that children should be treated like customers or products. Slaying Goliath is about the power of democracy, about the dangers of plutocracy, and about the potential of ordinary people—armed like David with only a slingshot of ideas, energy, and dedication—to prevail against those who are trying to divert funding away from our historic system of democratically governed, nonsectarian public schools. Among the lessons learned from the global pandemic of 2020 is the importance of our public schools and their teachers and the fact that distance learning can never replace human interaction, the personal connection between teachers and students.

[Are Prisons Obsolete?](#) Aug 10 2020 With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

Excellence, Reform, and Equity in Education Apr 05 2020

[An Expensive Way to Make Bad People Worse](#) Nov 05 2022 The author, himself a former inmate in the American Corrections System, writes about the state of the American prisons and the justice system and the American public's misconceptions about the system.

The Cambridge Review Apr 17 2021

[Usual Cruelty](#) Nov 24 2021 From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass

caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. Usual Cruelty is a profoundly radical reconsideration of the American "injustice system" by someone who is actively, wildly successfully, challenging it.

Classics in 19th and 20th Century Cambridge Aug 29 2019 Eight essays in which Classicists examine the history of their own subject as taught and practised at Cambridge University in the nineteenth and twentieth centuries, when the foundations were laid for the modern contours of the subject.

The Reform Advocate Sep 30 2019

Reforming the Malawian Public Sector Sep 22 2021 Reforming the Malawian Public Sector argues that the new public management model that Malawi, like most African countries, adopted under the influence of donor organisations has not led to the intended development. The book examines decentralisation, performance contracting, and public-private partnerships as key aspects of the reforms and comes to the conclusion that at best, it can be argued that the failures have been due to poor implementation and this could be attributed to the fact that the process was led by donors who lacked the necessary institutional infrastructure. The book uses the 2005/6 fertiliser subsidy programme, which the government embarked on despite donor resistance that it went against market models, but which turned out to be overwhelmingly successful to demonstrate the state's developmental ability and potential. This volume is essential reading for academics, students, and practitioners seeking a deeper understanding of public administration, management, policy, development and governance in Africa and the rest of the developing world. The book is dedicated to the memory of Guy Mhone, a Malawian, who was among Africa's leading scholars in public administration and governance. His works focused mainly on public sector reforms and development.

Encyclopedia of the Essay May 19 2021 This groundbreaking new source of international scope defines the essay as nonfictional prose texts of between one and 50 pages in length. The more than 500 entries by 275 contributors include entries on nationalities, various categories of essays such as generic (such as sermons, aphorisms), individual major works, notable writers, and periodicals that created a market for essays, and particularly famous or significant essays. The preface details the historical development of the essay, and the alphabetically arranged entries usually include biographical sketch, nationality, era, selected writings list, additional readings, and anthologies

Essays on Law Reform, Commercial Policy, Banks, Penitentiaries, Etc Jul 01 2022

Berkshire Dictionary of Chinese Biography Jun 27 2019 The Berkshire Dictionary of Chinese Biography, the first publication of its kind since 1898, is the work of more than one hundred internationally recognized experts from nearly a dozen countries. It has been designed to satisfy the growing thirst of students, researchers, professionals, and general readers for knowledge about China. It makes the entire span of Chinese history manageable by introducing the reader to emperors, politicians, poets, writers, artists, scientists, explorers, and philosophers who have shaped and transformed China over the course of five thousand years. In 135 entries, ranging from 1,000 to 8,000 words and written by some of the world's leading China scholars, the Berkshire Dictionary of Chinese Biography takes the reader from the important (even if possibly mythological) figures of ancient China to Communist leaders Mao Zedong and Deng Xiaoping. The in-depth essays provide rich historical context, and create a compelling narrative that weaves abstract concepts and disparate events into a coherent story. Cross-references between the articles show the connections between times, places, movements, events, and individuals.

The Athenaeum Dec 14 2020

A.I.D. Spring Review of Land Reform: Country papers Feb 25 2022

African Economies in Transition Apr 29 2022 An authoritative assessment of the reform efforts in African economies during the 1980s and early 1990s, with the focus on economic liberalization in those socialist countries which began from a position of pervasive state intervention. A companion theoretical volume (0-333-66545-7) examines the changing role of the state during the period of transition. This volume examines the important debate on agricultural reforms in the period, and provides in-depth country studies of the transition economies, covering Congo, Madagascar, Tanzania and the impact of war on transition in Angola and Mozambique. These books are the first in an important new series in association with the Centre for the Study of African Economies, University of Oxford.

The School-to-Prison Pipeline Nov 12 2020 Examines the relationship between the law and the school-to-prison pipeline, argues that law can be an effective weapon in the struggle to reduce the number of children caught, and discusses the consequences on families and communities.

Tinkering toward Utopia Mar 29 2022 For over a century, Americans have translated their cultural anxieties and hopes into dramatic demands for educational reform. Although policy talk has sounded a millennial tone, the actual reforms have been gradual and incremental. Tinkering toward Utopia documents the dynamic tension between Americans' faith in education as a panacea and the moderate pace of change in educational practices. In this book, David Tyack and Larry Cuban explore some basic questions about the nature of educational reform. Why have Americans come to believe that schooling has regressed? Have educational reforms occurred in cycles, and if so, why? Why has it been so difficult to change the basic institutional patterns of schooling? What actually happened when reformers tried to reinvent schooling? Tyack and Cuban argue that the ahistorical nature of most current reform proposals magnifies defects and understates the difficulty of changing the system. Policy talk has alternated between lamentation and overconfidence. The authors suggest that reformers today need to focus on ways to help teachers improve instruction from the inside out instead of decreeing change by remote control, and that reformers must also keep in mind the democratic purposes that guide public education.
