Navigating Fake News, Alternative Facts, and Misinformation in a Post-Truth World Dec 13 2020 In the current day and age, objective facts have less influence on opinions and decisions than personal emotions and beliefs. Many individuals rely on their social networks to gather information thanks to social media's ability to share information rapidly and over a much greater geographic range. However, this creates an overall false balance as people tend to seek out information that is compatible with their existing views and values. They deliberately seek out "facts" and data that specifically support their conclusions and classify any information that contradicts their beliefs as "false news." Navigating Fake News, Alternative Facts, and Misinformation in a Post-Truth World is a collection of innovative research on human and automated methods to deter the spread of misinformation online, such as legal or policy changes, information literacy workshops, and algorithms that can detect fake news dissemination patterns in social media. While highlighting topics including source credibility, share culture, and media literacy, this book is ideally designed for social media managers, technology and software developers, IT specialists, educators, columnists, writers, editors, journalists, broadcasters, newscasters, researchers, policymakers, and students.

Black Tigers Jan 14 2021 Since at least the seventh century C.E., Chinese ink rubbings of stone, metal, and wood inscriptions and pictorial images have been created to serve as precise copies of valuable material. These paper copies sometimes are all that remain of the original works. Despite the primary importance of this technology to history, art, archaeology, and many other fields, this is the first comprehensive study of rubbings in a Western language. Kenneth Starr is the former director of the Milwaukee Public Museum and former curator of Asiatic Archaeology at the Field Museum of Natural History in Chicago.

The 16 revised full papers presented together with 14 short papers were carefully reviewed and selected from 70 submissions. The papers cover a wide range of topics in the area of cryptography and cryptanalysis and are organized in the following topical sections: security of operating systems; secret sharing; encryption; malware and Critical infrastructures; cryptanalysis; block ciphers and stream ciphers; entity authentication; usability & risk perception; access control; computer security; privacy attacks; cryptography.

Scientific Investigation of Copies, Fakes and Forgeries Jul 28 2019 The faking and forgery of works of art and antiquities is probably now more extensive than ever before. The frauds are aided by new technologies, from ink jet printers to epoxy resins, and driven by the astronomical prices realised on the global market. This book aims to provide a comprehensive survey of the subject over a wide range of materials, emphasising how the fakes and forgeries are produced and how they may be detected by technical and scientific examination. The subject is exemplified by numerous case studies, some turning out not to be as conclusive as is sometimes believed. The book is aimed at those likely to have a serious interest in these investigations, be they curator, collector, conservator or scientist. Paul Craddock has recently retired from the Department of Conservation, Documentation and Science at the British Museum, where he was a materials scientist.

Fakes, Forgeries, and Fictions Jul 08 2020 Fakes, Forgeries, and Fictions examines the possible motivations behind the production of apocryphal Christian texts. Did the authors of Christian apocrypha intend to deceive others about the true origins of their writings? Did they do so in a way that is distinctly different from New Testament scriptural writings? What would phrases like "intended to deceive" or "true origins" even mean in various historical and cultural contexts? The papers in this volume, presented in September 2015 at York University in Toronto, discuss texts from as early as second-century papyrus fragments to modern apocrypha such as tales of Jesus in India in the nineteenth-century Life of Saint Issa. The highlights of the collection include a keynote address by Bart Ehrman ("Apocryphal Forgeries: The Logic of Literary Deceit") and a panel discussion on the Gospel of Jesus' Wife, reflecting on what reactions to this particular text--primarily on biblioblogs--can tell us about the creation, transmission, and reception of apocryphal Christian literature. The eye-opening papers presented at the panel caution and enlighten readers about the ethics of studying unprovenanced texts, the challenges facing female scholars both in the academy and online, and the shifting dynamics between online and traditional print scholarship.

Fake News Aug 21 2021 New perspectives on the misinformation ecosystem that is the production and circulation of fake news. What is fake news? Is it an item on Breitbart, an article in The Onion, an outright falsehood disseminated via Russian bot, or a catchphrase used by a politician to discredit a story he doesn't like? This book examines the real fake news: the constant flow of purposefully crafted, sensational, emotionally charged, misleading or totally fabricated information that mimics the form of mainstream news. Rather than viewing fake news through a single lens, the book maps the various kinds of misinformation through several different disciplinary perspectives, taking into account the overlapping contexts of politics, technology, and journalism. The contributors consider topics including fake news as "disorganized" propaganda; folkloric falsehood in the "Pizzagate" conspiracy; native advertising as counterfeit news; the limitations of regulatory reform and technological solutionism; Reddit's enabling of fake news; the psychological mechanisms by which people make sense of information; and the evolution of fake news in America. A section on media hoaxes and satire features an oral history of and an interview with prankster-activists the Yes Men, famous for parodies that reveal hidden truths. Finally, contributors consider possible solutions to the complex problem of fake news--ways to mitigate its spread, to teach students to find factually accurate information, and to go beyond fact-checking. Contributors Mark Andrejevic, Benjamin Burroughs, Nicholas Bowman, Mark Brewin, Elizabeth Cohen, Colin Doty, Dan Faltesek, Johan Farkas, Cherian George, Tarleton Gillespie, Dawn R. [Regret the Error](#) _____ Feb 12 2021 Winner of the National Press Club's Arthur Rowse Award for Press Criticism! From Craig Silverman, proprietor of www.RegretTheError.com, comes a lively journey through the history of media mistakes via a chronicle of funny, shocking, and often disturbing journalistic slip-ups. The errors--running the gamut from hilarious to tragic--include "Fuzzy Numbers" (when numbers and math undermine reporting) "Obiticide" (printing the obituary of a living person), and "Unintended Consequences" (typos and misidentifications that create a new, incorrect reality). While some of the errors are laugh-out-loud funny, the book also offers a serious investigation of contemporary journalism's lack of accountability to the public, and a rousing call to arms for all news organizations to mend their ways and reclaim the role of the press as honest voice of the people.

Social Media and Democracy Oct 30 2019 Over the last five years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. This book is the first of its kind to take stock of this emerging multi-disciplinary field by synthesizing what we know, identifying what we do not know and obstacles to future research, and charting a course for the future inquiry. Chapters by leading scholars cover major topics - from disinformation to hate speech to political advertising - and situate recent developments in the context of key policy questions. In addition, the book canvasses existing reform proposals in order to address widely perceived threats that social media poses to democracy. This title is also available as Open Access on Cambridge Core.

The contributors to this volume describe the recent advancements in three related parts: (1) user engagements in the dissemination of information disorder; (2) techniques on detecting and mitigating disinformation; and (3) trending issues such as ethics, blockchain, clickbaits, etc. This edited volume will appeal to students, researchers, and professionals working on disinformation, misinformation and fake news in social media from a unique lens.

[NISEMONOGATARI, Part 1](#) Nov 04 2022 Unlike ne'er-do-well former vampire Araragi, his two younger sisters Karen and Tsukihiko, who attend a private junior high, are little

balls of energy and charisma that their peers look up to. That the "ka" in Karen and "hi" in Tsukihime are both written with the character for "fire" isn't the only reason they've come to be known as the Fire Sisters. Karen is the brawn and Tsukihime the brains of a vigilantism that the pair sees not merely as defending justice but as justice itself. They can't encounter a harmful fad without trying to hunt down a specific source that had a motive for spreading it. In their big brother's humble opinion, there is something fake and precarious about it all. In this first of two parts, the immediate sequel to the legendary BAKEMONOGATARI plunges us into the middle of summer vacation in the mostly peaceful rural town where the series is set. As our hero and narrator can say from experience, however, teenagers with too much free time on their hands can get stung pretty badly.

Research Anthology on Fake News, Political Warfare, and Combatting the Spread of Misinformation Jun 18 2021 With recent headlines around fake news from world leaders and around presidential elections, Twitter and other social media platforms being pressured to detect and label misinformation posted on their platforms, as well as misinformation around COVID-19 and its vaccine, the world has seen an increase in protests, policy changes, and even chaos surrounding this information. This spread of misinformation, when left unchecked, can turn fiction into fact and result in a mass misconception of the truth that shapes opinions, creates false narratives, and impacts multiple facets of society in potentially detrimental ways, indicating a need for the latest research on how the devastating impacts of this trend, how to discern facts from misinformation, as well as more information on technological advancements in fake news detection. The Research Anthology on Fake News, Political Warfare, and Combatting the Spread of Misinformation is a compilation of the most comprehensive, previously published, and highly cited research from prestigious institutions including Columbia University and Stanford University, USA, which focuses on understanding fake news, how it spreads, its negative effects, and current solutions being investigated. While highlighting topics such as fake news, trending conspiracy theories, media distrust, political warfare, and detection methods, this book is ideally intended for practitioners, stakeholders, researchers, academicians, and students interested in the continuing surge of fake news and its, at times, dangerous results.

Crass Struggle Aug 28 2019 An original and cutting commentary on the bad side of the good life.

Identitti Aug 09 2020 THE SELOUT meets INTERIOR CHINATOWN in this satirical debut about race, sexuality and truth. German-Polish-Indian student Nivedita's world is upended when she discovers that her beloved professor who passed for Indian was born white. Nivedita (a.k.a. Identitti), a doctoral student who blogs about race with the help of Hindu goddess Kali, is in awe of Saraswati, her outrageous superstar post-colonial and race studies tutor. But Nivedita's life and sense of self begin to unravel when it emerges that Saraswati is actually white. Hours before she learns the truth Nivedita praises her tutor in a radio interview, jeopardising her own reputation and igniting an angry backlash among her peers and online community. Dumped by her boyfriend and disowned by her friends in the uproar, Nivedita is drawn to her supervisor in search of answers not only about Saraswati's identity, but also around her own. In her thought-provoking, complex and genre-bending debut, Mithu Sanyal collages commentary from real-life intellectuals, blogs, articles, race theory and academic warfare, combining campus novel and coming-of-age drama. A darkly comedic tour de force astutely translated by Alta L. Price, Identitti showcases the outsized power of social media in the current debates around identity politics and the power of claiming your own voice.

Fake It Oct 23 2021 In doing so he illuminates the process of artistic creation, which emerges as collaborative and imitative rather than individual and inspired, revealing that authorship is, to some degree, always forged.

Beyond Fake News Sep 21 2021 The world is swimming in misinformation. Conflicting messages bombard us every day with news on everything from politics and world events to investments and alternative health. The daily paper, nightly news, websites, and social media each compete for our attention and each often insist on a different version of the facts. Inevitably, we have questions: Who is telling the truth? How would we know? How did we get here? What can we do? Beyond Fake News answers these and other queries. It offers a technological and market-based explanation for how our informational environment became so polluted. It shows how purveyors of news often have incentives to mislead us, and how consumers of information often have incentives to be misled. And it chronicles how, as technology improves and the regulatory burdens drop, our information-scape becomes ever more littered with misinformation. Beyond Fake News argues that even when we really want the truth, our minds are built in such a way so as to be incapable of grasping many facts, and blind spots mar our view of the world. But we can do better, both as individuals and as a society. As individuals, we can improve the accuracy of our understanding of the world by knowing who to trust and recognizing our limitations. And as a society, we can take important steps to reduce the quantity and effects of misinformation.

The Great British FAKE Housing Crisis, Part 1 Sep 09 2020 England is a country obsessed by housing. Some people want to buy houses, some want to sell. Everyone wants to make a profit, build up capital and, probably, create a pile of money they can retire on and, hopefully, leave to their offspring. In other words, nobody has any idea what they are doing and, as any business person will tell you, are highly unlikely to succeed in their aims. Mickey, trying to enjoy the quiet life in North Salford, keeps coming across these failures. Some of them are his oldest - and bestest - friends. Mostly, he doesn't mind, but his best friend Don is a policeman dragged into a feud between building firms. Then Mickey meets his really best friend, a man he hasn't seen for years, and he's a property mogul too. Then Mickey is asked to work with and mentor a jailbird, a young man with a bright future and a disastrous past. The kid wants to build a house - on television. If only people weren't getting hurt - literally - Mickey might be able to walk away. But cuts, bruises, and then a real dead body, stands in his way. Concerned, overwhelmed, he does what he does best - try to help. Unfortunately, it's just not good enough, this time.

Delhi "A Role Model" Of Urban India Oct 11 2020 The book, packed in 22 chapters, provides in-depth and detailed information on different aspects of urban development. Issues, such as education, health, power, transport, stray animals, tourism, water, greenery, pollution, waste and sanitation management, disaster management, adulteration, crimes, social life, civic infrastructure, encroachment, unauthorized construction and illegal colonies, which the people in Delhi have been confronting for long, have been covered under the book. As Delhi is the national capital and the mirror of the country, the author has attempted to focus on the development of it as a role model of the urban India, to be replicated by others in respect of issues that affect the day-to-day life of a common man, people of all age groups, sex, religion, region, poor and rich, students, public and private sectors, bureaucrats, businessmen, industrialists and politicians. The book will be of immense value to policymakers, programme planners, public and private sectors, NGOs, social workers, environmental workers, educationists, developmental practitioners and the Delhiites who dream to see Delhi as "a world-class city".

Deep Natural Language Processing and AI Applications for Industry 5.0 Sep 29 2019 To sustain and stay at the top of the market and give absolute comfort to the consumers, industries are using different strategies and technologies. Natural language processing (NLP) is a technology widely penetrating the market, irrespective of the industry and domains. It is extensively applied in businesses today, and it is the buzzword in every engineer's life. NLP can be implemented in all those areas where artificial intelligence is applicable either by simplifying the communication process or by refining and analyzing information. Neural machine translation has improved the imitation of professional translations over the years. When applied in neural machine translation, NLP helps educate neural machine networks. This can be used by industries to translate low-impact content including emails, regulatory texts, etc. Such machine translation tools speed up communication with partners while enriching other business interactions. Deep Natural Language Processing and AI Applications for Industry 5.0 provides innovative research on the latest findings, ideas, and applications in fields of interest that fall under the scope of NLP including computational linguistics, deep NLP, web analysis, sentiments analysis for business, and industry perspective. This book covers a wide range of topics such as deep learning, deepfakes, text mining, blockchain technology, and more, making it a crucial text for anyone interested in NLP and artificial intelligence, including academicians, researchers, professionals, industry experts, business analysts, data scientists, data analysts, healthcare system designers, intelligent system designers, practitioners, and students.

The Psychology of Fake News Jan 26 2022 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.
