Children in the Holocaust and World War II Jul 09 2020 Children in the Holocaust and World War II is an extraordinary, unprecedented anthology of diaries written by children all across Nazi-occupied Europe and in England. Twenty-three young people, ages ten through eighteen, recount in vivid detail the horrors they lived through, day after day. As powerful as *The Diary of Anne Frank* and *Zlata's Diary*, here are children's experiences—all written with an unguarded eloquence that belies their years. The diarists include a Hungarian girl, selected by Mengele to be put in a line of prisoners who were tortured and murdered; a Danish Christian boy executed by the Nazis for his partisan work; and a twelve-year-old Dutch boy who lived through the Blitzkrieg in Rotterdam. In the Janowska death camp, eleven-year-old Pole Janina Heshele so inspired her fellow prisoners with the power of her poetry that they found a way to save her from the Nazi ovens. Mary Berg was imprisoned at sixteen in the Warsaw ghetto even though her mother was American and Christian. She left an eyewitness record of ghetto atrocities, a diary she was able to smuggle out of captivity. Moshe Flinker, a sixteen-year-old Netherlander, was betrayed by an informer who led the Gestapo to his family's door; Moshe and his parents died in Auschwitz in 1944. They come from Czechoslovakia, Austria, Israel, Poland, Holland, Belgium, Hungary, Lithuania, Russia, England, and Denmark. They write in spare, searing prose of life in ghettos and concentration camps, of bombings and Blitzkriegs, of fear and courage, tragedy and transcendence. Their voices and their vision ennoble us all.

The Incurrible Children of Ashton Place: Book II Jul 21 2021 Of especially naughty children it is sometimes said, "They must have been raised by wolves." The Incurrible children actually were. Thanks to the efforts of Miss Penelope Lumley, their plucky governess, Alexander, Beowulf, and Cassiopeia are much more like children than wolf pups now. They are accustomed to wearing clothes. They hardly ever howl at the moon. And for the most part, they resist the urge to chase squirrels up trees. Despite Penelope's civilizing influence, the Incurribles still managed to ruin Lady Constance's Christmas ball, nearly destroying the grand house. So while Ashton Place is being restored, Penelope, the Ashtons, and the children take up residence in London. Penelope is thrilled, as London offers so many opportunities to further the education of her unique students. But the city presents challenges, too, in the form of the palace guards' bearskin hats, which drive the children wild—not to mention the abundance of pigeons the Incurribles love to hunt. As they explore London, however, they discover more about themselves as clues about the children's—and Penelope's—mysterious past crop up in the most unexpected ways. . . .

The Vine of a Naked Child II Dec 26 2021 People who think they know everything are not willing to change anything. Some people think that all they have in life is what is in front of them. So they settle. They stay weak. Looking at Mary Thompson, she has it all in tact; the perfect painted face, the perfect hairstyle, and is well dressed, however, underneath the woven layers, lays dormant, a killer of souls. He is all she knows, or is it? Mary Thompson never expected to grow up the way she did, abused, misused, and rejected around each corner. All grown up, looking in the mirror, is when her true enemy reveals himself to her. She discovers that he is her family's enemy too. Only Mary stands a chance of saving them from an eternal death. But can she save them? Can she even save herself from sliding deeper into a dark pit, only to have the enemy ravish her again? Will she have enough strength to carry that endless burden? Psychologically destroyed, unstable and inexperienced in the strategies of spiritual warfare, Mary stands on a thin line between fear and faith, death and life. Will the dark side's gauntlet of trouble and turmoil keep her in bondage? Or will the grace of God, and her prophetic dreams lead to her deliverance?

Handbook of Psychological and Educational Assessment of Children, 2/e May 31 2022 The two volumes of the Handbook of Psychological and Educational Assessment of Children, Second Edition, cover all aspects of child and adolescent assessment. Leading clinical scientists summarize the state of the science of assessment paradigms, instruments, and methods. With an emphasis on practical clinical considerations, chapters also delve into issues related to test development, psychometrics, and bias. Conveniently designed for reference or text use, this vast knowledge base has been synthesized into two volumes which may be purchased separately or together. INTELLIGENCE, APTITUDE, AND ACHIEVEMENT surveys assessment of intelligence, learning styles, and academic achievement; covers historical issues and psychometric methods; and addresses diversity issues, ethical concerns, and special topics in mental testing. PERSONALITY, BEHAVIOR, AND CONTEXT reviews the use of projective methods, interviewing and observation, and objective methods of assessing personality and behavior; discusses the assessment of specific syndromes and symptoms; and presents tools for assessing adaptive skills and the family context.

Parenting Matters Nov 05 2022 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Children of World War II Jun 19 2021 There is a hidden legacy of war that is rarely talked about: the children of native civilians and enemy soldiers. What is their fate? This book unearths the history of the thousands of forgotten children of World War II, including its prelude and aftermath during the Spanish Civil War and the Allied occupation of Germany. It looks at liaisons between German soldiers and civilian women in the occupied territories, and the Nazi Lebensborn program of racial hygiene. It also considers the children of African-American soldiers and German women. The authors examine what happened when the foreign soldiers went home and discuss the policies adopted towards these children by the Nazi authorities as well as postwar national governments. Personal testimonies from the children themselves reveal the continued pain and shame of being children of the enemy. Case studies are taken from France, Germany, the Netherlands, Czechoslovakia, Norway, Denmark and Spain.

Pocket Book of Hospital Care for Children Aug 10 2020 The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. Transforming the Workforce for Children Birth Through Age 8 Oct 04 2022 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a

unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Behavior Therapy with Children II Aug 02 2022 The term behavior modification refers to the systematic analysis and change of human behavior and the principal focus is on overt behavior and its relationships to environmental variables. Behavior modification can be applied in many settings, the nature of which helps to define its subsets. Thus, applied in clinical settings, toward clinical goals, it encompasses the subset behavior therapy. In *Behavior Therapy with Children, Volume 2*, Anthony M. Graziano focuses on behavior therapy--specifically, the behavioral treatment of children's clinical problems. The field of behavior modification encompasses an astonishingly wide and varied spectrum of concepts about and approaches to education, clinical problems, social programming, and rehabilitation efforts. A conceptually and technologically rich medium, it has been nourished by the psychology laboratory, the school, and the psychiatric clinic. It is an area with diffuse boundaries surrounding a highly active center, within which apparently solid landmarks have already been worn away by the dissolving action of corrective self-criticism--immeasurably aided by the catalysts stirred in by the field's many critics. The activity continues, the dynamic field boils, and the medium enriches itself. There appears to be a tendency, particularly among new behavior therapists, to limit their focus too narrowly to the client's systems of overt behavior. In this project, psychological therapy begins with a personal, interactive social situation in which the generally expected human response of interest, sympathy, and support, is the minimum condition. Graziano maintains that these clinical sensitivity skills must be preserved in behavior therapy and enhance its important contribution to advancing the therapeutic endeavor. Anthony M. Graziano is professor emeritus in the Department of Psychology, State University of New York at Buffalo. He has published a number of articles in journals on subjects such as teaching machine programs, behavior therapy with children, diagnostic testing, the history of psychology, and evaluations of the contemporary mental health professions. He has been on the editorial board of *Behavior Modification* and on the board of directors for the Eastern Psychological Association.

The Outdoor Life of Children Apr 29 2022 Book Number Two in the Charlotte Mason Topics series, *The Outdoor Life of Children* is a compilation of Charlotte Mason's writings on the topics of Nature Study, teaching natural philosophy, and the importance of children being out-of-doors. Now all of Charlotte Mason's writings on Nature Study and the outdoors (from the original six-volume set) are located in this one, easy-to-use volume. The teachings and philosophies of Charlotte Mason, a British educator from the last century, are currently experiencing a revival, especially among American private and home schools. Mason's educational ideas were originally used by governesses in England to educate the children in their charge. Eventually, schools based on her philosophies sprung up throughout England, and her original training school became a college to supply teachers for the Parents' Union Schools throughout the world. Mason developed a lifetime love of learning in her students by actively engaging children firsthand with nature, literature, science, history, art, music, and avoiding dumbed-down materials - what she referred to as twaddle - as much as possible. The content of *The Outdoor Life of Children* was compiled and adapted by Deborah Taylor-Hough, long time homeschooling mother of three, author of *A Twaddle-Free Education: An Introduction to Charlotte Mason's Timeless Educational Ideas*, and editor of the Charlotte Mason eMagazine. CONTENTS INCLUDE: Knowledge Through Senses Out-of-Door Geography Flowers and Trees 'Living Creatures' Field-Lore and Naturalists' Books Walks in Bad Weather Teaching Natural Philosophy ... and more! From the Foreword: "Nature Study is the backbone of introductory natural sciences in Charlotte Mason style homes and school, but Mason also felt it was beneficial for children to spend a great deal of time out-of-doors for their physical, emotional, and spiritual health. "In spite of often rainy, inclement weather, Charlotte Mason insisted on going out once-a-week for an official Nature Walk, allowing the children to experience and observe the natural environment firsthand. These excursions were nature walks, not nature talks. "In addition to the weekly Nature Walks, Mason also recommended children spend large quantities of time outside each day, no matter what the weather. Take a daily walk for fun and fresh air. "I want to encourage those of you who don't have your own fields and forests, there are other readily available opportunities for outdoor play and learning activities. Basically, go outside with your kids as often as you can. You'll all be healthier and happier, and you may even learn a thing or two in the process." ~Deborah Taylor-Hough, Seattle 2015 *The Outdoor Life of Children: The Importance of Nature Study and Outside Activities* is available in both paperback and Kindle ebook formats.

The Life of General William Booth Aug 29 2019

Last Witnesses Mar 29 2022 “A masterpiece” (The Guardian) from the Nobel Prize–winning writer, an oral history of children’s experiences in World War II across Russia NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST For more than three decades, Svetlana Alexievich has been the memory and conscience of the twentieth century. When the Swedish Academy awarded her the Nobel Prize, it cited her for inventing “a new kind of literary genre,” describing her work as “a history of emotions . . . a history of the soul.” Bringing together dozens of voices in her distinctive style, *Last Witnesses* is Alexievich’s collection of the memories of those who were children during World War II. They had sometimes been soldiers as well as witnesses, and their generation grew up with the trauma of the war deeply embedded—a trauma that would change the course of the Russian nation. Collectively, this symphony of children’s stories, filled with the everyday details of life in combat, reveals an altogether unprecedented view of the war. Alexievich gives voice to those whose memories have been lost in the official narratives, uncovering a powerful, hidden history from the personal and private experiences of individuals. Translated by the renowned Richard Pevear and Larissa Volokhonsky, *Last Witnesses* is a powerful and poignant account of the central conflict of the twentieth century, a kaleidoscopic portrait of the human side of war. Praise for *Last Witnesses* “There is a special sort of clear-eyed humility to [Alexievich’s] reporting.”—The Guardian “A bracing reminder of the enduring power of the written word to testify to pain like no other medium. . . . Children survive, they grow up, and they do not forget. They are the first and last witnesses.”—The New Republic “A profound triumph.”—The Big Issue “[Alexievich] excavates and briefly gives prominence to demolished lives and eradicated communities. . . . It is impossible not to turn the page, impossible not to wonder whom we next might meet, impossible not to think differently about children caught in conflict.”—The Washington Post
