Indo-European Perspectives Sep 10 2020 This book brings together new and original work by forty two of the world's leading scholars of Indo-European comparative philology and linguistics from around the world. It shows the breadth and the continuing liveliness of enquiry in an area which over the last century and a half has opened many unique windows on the civilizations of the ancient world. The volume is a tribute to Anna Morpurgo Davies to mark her retirement as the Diebold Professor of Comparative Philology at the University of Oxford. The book's six parts are concerned with the early history of Indo-European (Part I); language use, variation, and change in ancient Greece and Anatolia (Parts II and III); the Indo-European languages of Western Europe, including Latin, Welsh, and Anglo-Saxon (Part

IV); the ancient Indo-Iranian and Tocharian languages (Part V); and the history of Indo-European linguistics (Part VI). Indo-European Perspectives will interest scholars and students of Indo-European philology, historical linguistics, classics, and the history of the ancient world.

Museums and Galleries of Milan Feb 25 2022 **Consuls and Res Publica** Aug 02 2022 The consulate was the focal point of Roman politics. Both the ruling class and the ordinary citizens fixed their gaze on the republic's highest office - to be sure, from different perspectives and with differing expectations. While the former aspired to the consulate as the defining magistracy of their social status, the latter perceived it as the embodiment of the Roman state. Holding high office was thus not merely a political exercise. The consulate prefigured all aspects of public life, with consuls taking care of almost every aspect of the administration of the Roman state. This multifaceted character of the consulate invites a holistic investigation. The scope of this book is therefore not limited to political or constitutional questions. Instead, it investigates the predominant role of the consulate in and its impact on, the political culture of the Roman republic.

Music and Medieval Manuscripts Nov 05 2022 The interdisciplinary approach of Music and Medieval Manuscripts is modeled on the work of the scholar to whom the book is dedicated. Professor Andrew Hughes is recognized internationally for his work on medieval manuscripts, combining the areas of paleography, performance, liturgy and music. All these areas of research are represented in this collection with an emphasis on the

continuity between the physical characteristics of medieval manuscripts and their different uses. Albert Derolez provides a landmark and controversial essay on the origins of pre-humanistic script, while Margaret Bent proposes a new interpretation of a famous passage from a fifteenth-century poem by Martin Le Franc. Timothy McGee contributes an innovative essay on late-medieval music, text and rhetoric. David Hiley discusses musical changes and variation in the offices of a major saint's feast, and Craig Wright presents an original study of Guillaume Dufay. Jan Ziolkowski treats the topic of neumed classics, an under-explored aspect of the history of medieval pedagogy and the transmission of texts. The essays that comprise this volume offer a unique focus on medieval manuscripts from a wide range of perspectives, and will appeal to musicologists and medievalists alike. *Italian Historical Rural Landscapes* Jun 19 2021 Sustainable development and rural policies have pursued strategies where farming has been often regarded as a factor deteriorating the ecosystem. But the current economic, social and environmental problems of the Earth probably call for examples of a positive integration between human society and nature. This research work presents more than a hundred case studies where the historical relationships between man and nature have generated, not deterioration, but cultural, environmental, social and economic values. The results show that is not only the economic face of globalization that is negatively affecting the landscape, but also inappropriate environmental policies. The CBD-UNESCO program on biocultural diversity, the FAO

Globally Important Agricultural Heritage Systems and several projects of the International Union of Forest Research Organizations, as well as European rural policies acknowledge the importance of cultural values associated to landscape. This research intends to support these efforts.

Castellani and Italian Archaeological Jewelry Mar 05 2020 During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the family's involvement in the cultural and political life of their city and country.

The Undeciphered Signs of Linear B Jul 29 2019 Ground-breaking analysis of the Linear B undeciphered signs shedding light on the writing system and the activities of its writers. *Italian Folk* Dec 14 2020 Sunday dinners, basement kitchens, and backyard gardens are everyday cultural entities long associated with Italian Americans, yet the general perception of

them remains superficial and stereotypical at best. For many people, these scenarios trigger ingrained assumptions about individuals' beliefs, politics, aesthetics, values, and behaviors that leave little room for nuance and elaboration. This collection of essays explores local knowledge and aesthetic practices, often marked as "folklore," as sources for creativity and meaning in Italian-American lives. As the contributors demonstrate, folklore provides contemporary scholars with occasions for observing and interpreting behaviors and objects as part of lived experiences. Its study provides new ways of understanding how individuals and groups reproduce and contest identities and ideologies through expressive means. Italian Folk offers an opportunity to reexamine and rethink what we know about Italian Americans. The contributors to this unique book discuss historic and contemporary cultural expressions and religious practices from various parts of the United States and Canada to examine how they operate at local, national, and transnational levels. The essays attest to people's ability and willingness to create and reproduce certain cultural modes that connect them to social entities such as the family, the neighborhood, and the amorphous and fleeting communities that emerge in large-scale festivals and now on the Internet. Italian Americans abandon, reproduce, and/or revive various cultural elements in relationship to ever-shifting political, economic, and social conditions. The results are dynamic, hybrid cultural forms such as *valtaro* accordion music, Sicilian oral poetry, a Columbus Day parade, and witchcraft (*stregheria*). By taking a closer look and an ethnographic approach to expressive behavior, we see that Italian-American identity is far from being a linear path of assimilation from Italian immigrant to American of Italian descent but is instead fraught with conflict, negotiation, and creative solutions. Together, these essays illustrate how folklore is evoked in the continual process of identity reevaluation and reformation.

Literature in Second Language Education Oct 04 2022 This book proposes the study of literary texts as a vital component of L2 linguistic and cultural knowledge. The research, conducted with students of Italian in Australia, is situated in the wider L2 context, and compared to studies on students' perceptions of English and French literary texts in countries such as Canada, Italy, Australia, Germany and the Ukraine. The first part of the book takes the debate on the inclusion of literature in language education as a springboard for posing crucial questions about how students, and educators, view literature.

The theoretical framework draws from educational, linguistic, philosophical and literary theories, and focuses on the role of awareness in learning and the role of the learner's experience. The second part of the book evaluates an innovative approach to teaching and learning L2 literature, and discusses the application of this to the language classroom. Containing a balance of theoretical and practical concerns, this book will be invaluable reading for researchers of applied linguistics and second language acquisition.

Neo-Kantianism and Cultural Sciences Apr 05 2020 Il volume si propone di indagare, dal punto di vista sia storiografico che teoretico, la peculiare relazione che si instaurò tra le diverse scuole di pensiero neokantiane e quelle discipline che tra fine Ottocento e inizio Novecento furono rubricate sotto il titolo di scienze della cultura o scienze dello spirito. Il neokantismo svolse, difatti, un ruolo di primissimo piano nella formazione dello scenario filosofico e culturale tedesco del secolo scorso, divenendo, da un lato, una fonte inesauribile di idee e metodi per le cosiddette Kulturwissenschaften, e accogliendo, dall'altro lato, entro il suo poliedrico sviluppo, alcune decisive istanze veicolate da tali scienze. Il volume prova a circoscrivere questa vasta problematica mediante incursioni storico-problematiche intorno ad alcune figure e problemi centrali della vasta costellazione neokantiana. I temi affrontati nei saggi concernono gli assetti sistematici della metodologia di impronta neokantiana e il loro riflettersi nelle molteplici applicazioni disciplinari, dalla giurisprudenza alla linguistica, dall'estetica alla storiografia filosofica, dalla sociologia alla psicologia. Non mancano infine contributi che provano ad isolare i motivi filosofici ultimi della riflessione neokantiana sulla Kultur.

Cultures of Plague Jan 27 2022 Cultures of Plague opens a new chapter in the history of medicine. Neither the plague nor the ideas it stimulated were static, fixed in a timeless Galenic vacuum over five centuries, as historians and scientists commonly assume. As plague evolved in its pathology, modes of transmission, and the social characteristics of its victims, so too did medical thinking about plague develop. This study of plague imprints from academic medical treatises to plague poetry highlights the most feared and devastating epidemic of the sixteenth-century, one that threatened Italy top to toe from 1575 to 1578 and unleashed an avalanche of plague writing. From erudite definitions, remote causes, cures and recipes, physicians now directed their plague writings to the prince and discovered their most 'valiant remedies' in public health: strict segregation of the healthy and ill, cleaning streets and latrines, addressing the long-term causes of plague-poverty. Those outside the medical profession joined the chorus. In the heartland of Counter-Reformation Italy, physicians along with those outside the profession questioned the foundations of Galenic and Renaissance medicine, even the role of God. Assaults on medieval and Renaissance medicine did not need to await the Protestant-Paracelsian alliance of seventeenth-century in northern Europe. Instead, creative forces planted by the pandemic of 1575-8 sowed seeds of doubt and unveiled new concerns and ideas within that supposedly most conservative form of medical writing, the plague tract. Relying on health board statistics and dramatized with eyewitness descriptions of bizarre happenings, human misery, and suffering, these writers created the structure for plague classics of the eighteenth century, and by tracking the contagion's complex and crooked paths, they anticipated trends of nineteenth-century epidemiology.
