Pediatric Board Study Guide Oct 11 2020 Building upon the highly successful 1st edition, this book is a comprehensive review designed to prepare pediatric residents, fellows, and pediatricians for the General Pediatrics Certifying Examination, and for the American Board of Pediatrics Maintenance of Certification. Pediatric Board Study Guide: A Last Minute Review, 2nd edition, covers all aspects of pediatric medicine; each chapter has been updated according to the most recent content specifications provided by the ABP. The 2nd edition provides more illustrations, diagrams, radiology images, and clinical case scenarios to further assist readers in reviewing pediatric subspecialties. New chapter topics include nutrition, sports medicine, patient safety, quality improvement, ethics, and pharmacology. Finally, the book closes with a "Last Minute Review" of high-yield cases arranged in the same sequence as the chapters, providing readers with a concise study guide of critical cases and conditions. Pediatric residents and fellows preparing for the board examination, pediatricians, and pediatric subspecialists preparing for certification maintenance will find Pediatric Board Study Guide: A Last Minute Review, 2nd edition easy to use and comprehensive, making it the ideal resource and study tool.

The Spy Catchers of Maple Hill Dec 25 2021 Hazel Kaplansky and new student Samuel Butler investigate rumors that a Russian spy has infiltrated their small Vermont town, amidst the fervor of Cold War era McCarthyism, but more is revealed than they could ever have imagined.

Tuesdays with Morrie Nov 11 2020 #1 NEW YORK TIMES BESTSELLER • A special 25th anniversary edition of the beloved book that changed millions of lives—with a new afterword by the author "A wonderful book, a story of the heart told by a writer with soul."—Los Angeles Times Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

Queen of the Maple Leaf May 30 2022 As modern versions of the settler nation took root in twentieth-century Canada, beauty emerged as a business. Queen of the Maple Leaf deftly uncovers the codes of femininity, class, sexuality, and race that beauty pageants exemplified, whether they took place on local or national stages. A union-organized pageant such as Queen of the Dressmakers, for example, might uplift working-class women, but immigrant women need not apply. Patrizia Gentile demonstrates how beauty contests connected female bodies to white, wholesome, respectable, middle-class femininity, locating their longevity squarely within their capacity to reassert the white heteropatriarchy at the heart of settler societies.

Good Neighbors May 18 2021 "A modern-day Crucible...Beneath the surface of a suburban utopia, madness lurks."—Liv Constantine, bestselling author of The Last Mrs. Parrish "Sarah Langan is a phenomenal talent with a wicked sense of wry humor. Good Neighbors knocked me out. Like Shirley Jackson, Langan's work blends a bleak streak with an underlying sense of the humane that wrung my heart."—Victor LaValle, author of The Changeling Celeste Ng's enthralling dissection of suburbia meets Shirley Jackson's creeping dread in this propulsive literary noir, when a sudden tragedy exposes the depths of deception and damage in a Long Island suburb—pitting neighbor against neighbor and putting one family in terrible danger. Welcome to Maple Street, a picture-perfect slice of suburban Long Island, its residents bound by their children, their work, and their illusion of safety in a rapidly changing world. Arlo Wilde, a gruff has-been rock star who's got nothing to show for his fame but track marks, is always two steps behind the other dads. His wife, beautiful ex-pagant queen Gertie, feels socially ostracized and adrift. Spunky preteen Julie curses like a sailor and her kid brother Larry is called "Robot Boy" by the kids on the block. Their next-door neighbor and Maple Street's Queen Bee, Rhea Schroeder—a lonely community college professor repressing her own dark past—welcomes Gertie and family into the fold. Then, during one spritzer-fueled summer evening, the new best friends share too much, too soon. As tensions mount, a sinkhole opens in a nearby park, and Rhea's daughter Shelly falls inside. The search for Shelly brings a shocking accusation against the Wildes that spins out of control. Suddenly, it is one mom's word against the other's in a court of public opinion that can end only in blood. A riveting and ruthless portrayal of American suburbia, Good Neighbors excavates the perils and betrayals of motherhood and friendships and the dangerous clash between social hierarchy, childhood trauma, and fear.

Last Stop on Market Street Jun 06 2020 #1 New York Times Bestseller A USA Today Bestseller Winner of the Newbery Medal A Caldecott Honor Book A Coretta Scott King Illustrator Honor Book This award-winning modern classic—a must-have for every child's home library—is an inclusive ode to kindness, empathy, gratitude, and finding joy in unexpected places, and celebrates the special bond between a curious young boy and his loving grandmother. Every Sunday after church, CJ and his grandma ride the bus across town. But today, CJ wonders why they don't own a car like his friend Colby. Why doesn't he have an iPod like the boys on the bus? How come they always have to get off in the dirty part of town? Each question is met with an encouraging answer from grandma, who helps him see the beauty—and fun—in their routine and the world around them. This energetic ride through a bustling city highlights the wonderful perspective only grandparent and grandchild can share, and comes to life through Matt de la Peña's vibrant text and Christian Robinson's radiant illustrations.

Walk Two Moons Jun 18 2021 In her own singularly beautiful style, Newbery Medal winner Sharon Creech intricately weaves together two tales, one funny, one bittersweet, to create a heartwarming, compelling, and utterly moving story of love, loss, and the complexity of human emotion. Thirteen-year-old Salamanca Tree Hiddle, proud of her country roots and the "Indian-ness in her blood," travels from Ohio to Idaho with her eccentric grandparents. Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a "potential lunatic," and whose mother disappeared. As Sal entertains her grandparents with Phoebe's outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to be reunited with her missing mother.

If You Come Softly Oct 23 2021 A lyrical story of star-crossed love perfect for readers of The Hate U Give, by National Ambassador for Children's Literature Jacqueline Woodson Jeremiah feels good inside his own skin. That is, when he's in his own Brooklyn neighborhood. But now he's going to be attending a fancy prep school in Manhattan, and black teenage boys don't exactly fit in there. So it's a surprise when he meets Ellie the first week of school. In one frozen moment their eyes lock, and after that they know they fit together—even though she's Jewish and he's black. Their worlds are so different, but to them that's not what matters. Too bad the rest of the world has to get in their way. Jacqueline Woodson's work has been called "moving and resonant" (Wall Street Journal) and "gorgeous" (Vanity Fair). Now celebrating its twentieth anniversary, and including a new preface by the author, If You Come Softly is a powerful story of interracial love that leaves readers wondering "why" and "if only . . ."

The Mathematics Survival Kit Mar 16 2021 So simple and yet so powerful, it's a wonder that we haven't seen a book like this before. The Mathematics Survival Kit gives you exactly what you need to continue with your homework with quick 5-minute concise and friendly reviews of 115 mathematical concepts. Combining high school course outlines, the standard first year university calculus and algebra curricula, and thirty years of teaching experience, the author has identified those topics that students, from high school to university, find most problematic and offers a handy reference for tackling those concepts in a step-by-step fashion.

The Book Thief Jul 20 2021 #1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of I Am the Messenger, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing."—The New York Times "Deserves a place on the same shelf with The Diary of a Young Girl by Anne Frank."—USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

The Sign of The Beaver Jan 02 2020 A 1984 Newbery Honor Book Although he faces responsibility bravely, thirteen-year-old Matt is more than a little apprehensive when his father leaves him alone to guard their new cabin in the wilderness. When a renegade white stranger steals his gun, Matt realizes he has no way to shoot game or to protect himself. When Matt meets Atean, a boy in the Beaver clan, he begins to better understand their way of life and their growing problem in adapting to the white man and the changing frontier. Elizabeth George Speare's Newbery Honor-winning survival story is filled with wonderful detail about living in the wilderness and the relationships that formed between settlers and natives in the 1700s. Now with an introduction by Joseph Bruchac.

Pediatric Board Study Guide Jun 26 2019 Covers the most frequently asked and tested points on the pediatric board exam. Each chapter offers a quick review of specific diseases and conditions clinicians need to know during the patient encounter. Easy-to-use and comprehensive, clinicians will find this guide to be the ideal final resource needed before taking the pediatric board exam.

Advanced Problem Solving with Maple Mar 28 2022 Problem Solving is essential to solve real-world problems. Advanced Problem Solving with Maple: A First Course applies the mathematical modeling process by formulating, building, solving, analyzing, and criticizing mathematical models. It is intended for a course introducing students to mathematical topics they will revisit within their further studies. The authors present mathematical modeling and problem-solving topics using Maple as the computer algebra system for mathematical explorations, as well as obtaining plots that help readers perform analyses. The book presents cogent applications that demonstrate an effective use of Maple, provide discussions of the results obtained using Maple, and stimulate thought and analysis of additional applications. Highlights: The book's real-world case studies prepare the student for modeling applications Bridges the study of topics and applications to various fields of mathematics, science, and

engineering Features a flexible format and tiered approach offers courses for students at various levels The book can be used for students with only algebra or calculus behind them About the authors: Dr. William P. Fox is an emeritus professor in the Department of Defense Analysis at the Naval Postgraduate School. Currently, he is an adjunct professor, Department of Mathematics, the College of William and Mary. He received his Ph.D. at Clemson University and has many publications and scholarly activities including twenty books and over one hundred and fifty journal articles. William C. Bauldry, Prof. Emeritus and Adjunct Research Prof. of Mathematics at Appalachian State University, received his PhD in Approximation Theory from Ohio State. He has published many papers on pedagogy and technology, often using Maple, and has been the PI of several NSF-funded projects incorporating technology and modeling into math courses. He currently serves as Associate Director of COMAP's Math Contest in Modeling (MCM).

Wiley CPAexcel Exam Review April 2017 Study Guide Aug 21 2021 The Wiley CPAexcel Study Guide: Financial Accounting and Reporting arms CPA test-takers with detailed text and skill-building problems to help identify, focus on, and master the specific topics that may need additional reinforcement to pass the FAR section of the CPA Exam. Advanced Engineering Mathematics Oct 03 2022 This innovative text was written for the one or two-semester, sophomore/junior level advanced maths course for engineers. It was built from the ground up using a Computer Algebra System, offering the student opportunities to visualize and experience the maths at every turn. The text has been designed to accommodate a variety of teaching styles, and varying levels on technology integration. It has a logical arrangement with many short self-contained sections, and many real-world applications of interest to engineering students. Chapter Introductions and Chapter Summaries help to make the material more accessible, and Chapter Review Exercises provides constant checks along the way. *A CD-ROM is included in the back of every book, which contains Maple worksheets. The Maple worksheets are fully integrated with the books content, and provide a great resource for students when working on exercise sections. The CD-ROM allows the instructor and the student to take full advantage of what the text has to offer. *Logical arrangement with many short self-contained sections. *Exercises are divided into two sections: those designed to be computed by hand (A exercises), and those to be computed w

A Wrinkle in Time Jul 08 2020 A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Introduction to Cryptography with Maple Apr 16 2021 This introduction to cryptography employs a programming-oriented approach to study the most important cryptographic schemes in current use and the main cryptanalytic attacks against them. Discussion of the theoretical aspects, emphasizing precise security definitions based on methodological tools such as complexity and randomness, and of the mathematical aspects, with emphasis on number-theoretic algorithms and their applications to cryptography and cryptanalysis, is integrated with the programming approach, thus providing implementations of the algorithms and schemes as well as examples of realistic size. A distinctive feature of the author's approach is the use of Maple as a programming environment in which not just the cryptographic primitives but also the most important cryptographic schemes are implemented following the recommendations of standards bodies such as NIST, with many of the known cryptanalytic attacks implemented as well. The purpose of the Maple implementations is to let the reader experiment and learn, and for this reason the author includes numerous examples. The book discusses important recent subjects such as homomorphic encryption, identity-based cryptography and elliptic curve cryptography. The algorithms and schemes which are treated in detail and implemented in Maple include AES and modes of operation, CMAC, GCM/GMAC, SHA-256, HMAC, RSA, Rabin, ElGamal, Paillier, Cocks IBE, DSA and ECDSA. In addition, some recently introduced schemes enjoying strong security properties, such as RSA-OAEP, Rabin-SAEP, Cramer-Shoup, and PSS, are also discussed and implemented. On the cryptanalysis side, Maple implementations and examples are used to discuss many important algorithms, including birthday and man-in-the-middle attacks, integer factorization algorithms such as Pollard's rho and the quadratic sieve, and discrete log algorithms such as baby-step giant-step, Pollard's rho, Pohlig-Hellman and the index calculus method. This textbook is suitable for advanced undergraduate and graduate students of computer science, engineering and mathematics, satisfying the requirements of various types of courses: a basic introductory course; a theoretically oriented course whose focus is on the precise definition of security concepts and on cryptographic schemes with reductionist security proofs; a practice-oriented course requiring little mathematical background and with an emphasis on applications; or a mathematically advanced course addressed to students with a stronger mathematical background. The main prerequisite is a basic knowledge of linear algebra and elementary calculus, and while some knowledge of probability and abstract algebra would be helpful, it is not essential because the book includes the necessary background from these subjects and, furthermore, explores the number-theoretic material in detail. The book is also a comprehensive reference and is suitable for self-study by practitioners and programmers.

Numerical Analysis Mar 04 2020 This well-respected text gives an introduction to the theory and application of modern numerical approximation techniques for students taking a one- or two-semester course in numerical analysis. With an accessible treatment that only requires a calculus prerequisite, Burden and Faires explain how, why, and when approximation techniques can be expected to work, and why, in some situations, they fail. A wealth of examples and exercises develop students' intuition, and demonstrate the subject's practical applications to important everyday problems in math, computing, engineering, and physical science disciplines. The first book of its kind built from the ground up to serve a diverse undergraduate audience, three decades later Burden and Faires remains the definitive introduction to a vital and practical subject. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Advanced Engineering Mathematics Dec 13 2020 The text has been divided in two volumes: Volume I (Ch. 1-13) & Volume II (Ch. 14-22). In addition to the review material and some basic topics as discussed in the opening chapter, the main text in Volume I covers topics on infinite series, differential and integral calculus, matrices, vector calculus, ordinary differential equations, special functions and Laplace transforms. Volume II covers topics on complex analysis, Fourier analysis, partial differential equations and statistics. The present book has numerous distinguishing features over the already existing books on the same topic. The chapters have been planned to create interest among the readers to study and apply the mathematical tools. The subject has been presented in a very lucid and precise manner with a wide variety of examples and exercises, which would eventually help the reader for hassle free study.

Mortgage Math Jan 14 2021 The Mortgage Math book will help real estate professionals, loan originators, and home buyers understand the math associated with the mortgage industry. There are sections on periodic interest, payments, loan-to-value, debt-to-income ratios, maximum payment, maximum price, discount points, closing costs and prepaid items, and adjustable rate mortgages (ARMs).

The Underground Railroad Apr 04 2020 Winner of the Pulitzer Prize and the National Book Award, this #1 New York Times bestseller chronicles a young slave's adventures as she makes a desperate bid for freedom in the antebellum South. The basis for the acclaimed original Amazon Prime Video series directed by Barry Jenkins. Cora is a slave on a cotton plantation in Georgia. An outcast even among her fellow Africans, she is on the cusp of womanhood—where greater pain awaits. And so when Caesar, a slave who has recently arrived from Virginia, urges her to join him on the Underground Railroad, she seizes the opportunity and escapes with him. In Colson Whitehead's ingenious conception, the Underground Railroad is no mere metaphor: engineers and conductors operate a secret network of actual tracks and tunnels beneath the Southern soil. Cora embarks on a harrowing flight from one state to the next, encountering, like Gulliver, strange yet familiar iterations of her own world at each stop. As Whitehead brilliantly re-creates the terrors of the antebellum era, he weaves in the saga of our nation, from the brutal abduction of Africans to the unfulfilled promises of the present day. The Underground Railroad is both the gripping tale of one woman's will to escape the horrors of bondage—and a powerful meditation on the history we all share. Look for Colson Whitehead's bestselling new novel, Harlem Shuffle!

Getting Started with Maple Nov 23 2021 The purpose of this guide is to give a quick introduction on how to use Maple. It primarily covers Maple 12, although most of the guide will work with earlier versions of Maple. Also, throughout this guide, we will be suggesting tips and diagnosing common problems that users are likely to encounter. This should make the learning process smoother. This guide is designed as a self-study tutorial to learn Maple. Our emphasis is on getting you quickly up to speed. This guide can also be used as a supplement (or reference) for students taking a mathematics (or science) course that requires use of Maple, such as Calculus, Multivariable Calculus, Advanced Calculus, Linear Algebra, Discrete Mathematics, Modeling, or Statistics.

Maple Sep 09 2020 Lori Nichols' enchanting debut features an irresistible, free-spirited, nature-loving little girl who greets the changing seasons and a new sibling with arms wide open. When Maple is tiny, her parents plant a maple tree in her honor. She and her tree grow up together, and even though a tree doesn't always make an ideal playmate, it doesn't mind when Maple is in the mood to be loud—which is often. Then Maple becomes a big sister, and finds that babies have their loud days, too. Fortunately, Maple and her beloved tree know just what the baby needs.

The House on Mango Street Jun 30 2022 NATIONAL BESTSELLER • A coming-of-age classic, acclaimed by critics, beloved by readers of all ages, taught in schools and universities alike, and translated around the world—from the winner of the 1919 PEN/Nabokov Award for Achievement in International Literature. The House on Mango Street is the remarkable story of Esperanza Cordero, a young Latina girl growing up in Chicago, inventing for herself who and what she will become. Told in a series of vignettes—sometimes heartbreaking, sometimes deeply joyous—Sandra Cisneros' masterpiece is a classic story of childhood and self-discovery. Few other books in our time have touched so many readers. "Cisneros draws on her rich [Latino] heritage . . . and seduces with precise, spare prose, creat[ing] unforgettable characters we want to lift off the page. She is not only a gifted writer, but an absolutely essential one." —The New York Times Book Review

Coming of Age in Mississippi Feb 01 2020 The unforgettable memoir of a woman at the front lines of the civil rights movement—a harrowing account of black life in the rural South and a powerful affirmation of one person's ability to affect change. "Anne Moody's autobiography is an eloquent, moving testimonial to her courage."—Chicago Tribune Born to a poor couple who were tenant farmers on a plantation in Mississippi, Anne Moody lived through some of the most dangerous days of the pre-civil rights era in the South. The week before she began high school came the news of Emmet Till's lynching. Before then, she had "known the fear of hunger, hell, and the Devil. But now there was . . . the fear of being killed just because I was black." In that moment was born the passion for freedom and justice that would change her life. A straight-A student who realized her dream of going to college when she won a basketball scholarship, she finally dared to join the NAACP in her junior year. Through the NAACP and later through CORE and SNCC, she experienced firsthand the demonstrations and sit-ins that were the mainstay of the civil rights movement—and the arrests and jailings, the shotguns, fire hoses, police dogs, billy clubs, and deadly force that were used to destroy it. A deeply personal story but also a portrait of a turning point in our nation's destiny, this autobiography lets us see history in the making, through the eyes of one of the footsoldiers in the civil rights movement. Praise for Coming of Age in Mississippi "A history of our time, seen from the bottom up, through the eyes of someone who decided for herself that things had to be changed . . . a timely reminder that we cannot now relax."—Senator Edward Kennedy, The New York Times Book Review "Something is new here . . . rural southern black life begins to speak. It hits the page like a natural force, crude and undeniable and, against all principles of beauty, beautiful."—The Nation "Engrossing, sensitive, beautiful . . . so candid, so honest, and so touching, as to make it virtually impossible to put down."—San Francisco Sun-Reporter

The Clockmaker's Daughter May 06 2020 INSTANT NEW YORK TIMES BESTSELLER "An ambitious, compelling historical mystery with a fabulous cast of characters...Kate Morton at her very best." —Kristin Hannah "An elaborate tapestry.Morton doesn't disappoint." —The Washington Post "Classic English country-house Goth at its finest." —New York

Post In the depths of a 19th-century winter, a little girl is abandoned on the streets of Victorian London. She grows up to become in turn a thief, an artist's muse, and a lover. In the summer of 1862, shortly after her eighteenth birthday, she travels with a group of artists to a beautiful house on a bend of the Upper Thames. Tensions simmer and one hot afternoon a gunshot rings out. A woman is killed, another disappears, and the truth of what happened slips through the cracks of time. It is not until over a century later, when another young woman is drawn to Birchwood Manor, that its secrets are finally revealed. Told by multiple voices across time, this is an intricately layered, richly atmospheric novel about art and passion, forgiveness and loss, that shows us that sometimes the way forward is through the past.

The Maples Stories Feb 24 2022 Collected together for the first time in hardcover, these eighteen classic stories from across John Updike's career form a luminous chronicle of the life and times of one marriage in all its rich emotional complexity. In 1956, Updike published a story, "Snowing in Greenwich Village," about a young couple, Joan and Richard Maple, at the beginning of their marriage. Over the next two decades, he returned to these characters again and again, tracing their years together raising children, finding moments of intermittent happiness, and facing the heartbreak of infidelity and estrangement. Seventeen Maples stories were collected in 1979 in a paperback edition titled Too Far to Go, prompted by a television adaptation. Now those stories appear in hardcover for the first time, with the addition of a later story, "Grandparenting," which returns us to the Maples's lives long after their wrenching divorce.
