Drug Abuse: Prevention and Treatment Aug 10 2020 Ever since the Shanghai convention in 1909, the threat posed to human well-being by drug abuse has led countries around the world to take action to deal with their drug problems. There are wide variations in the policies pursued, but most countries try to reduce both the supply of and the demand for drugs. Unfortunately, there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them. Consequently, control and prevention policies are mostly driven by political considerations, economic realities and cultural expectations, though research has played an important part in formulating and evaluating treatments for drug addiction. This volume reviews studies on drug abuse prevention and treatment strategies under five main areas: 1. Reducing supply - strategies to control the flow of drugs from production to retail distribution; 2. Reducing demand - prevention of drug use at all stages of involvement and consumption levels; 3. Reducing harm - promoting situational risk reduction practices for regular users, addicts and recreational users; 4. Reducing addiction - drug treatment options for various groups in various settings; and 5. Drug policies and prescriptions - focused on debates about prohibition and legalization.

Substance Abuse Prevention in Multicultural Communities Mar 29 2022 This insightful volume describes a sample of prevention demonstration projects of the Center for Substance Abuse Prevention (CSAP). Substance Abuse Prevention in Multicultural Communities illuminates various aspects of prevention theory, practice, and research with a focus on the design, implementation, adaptation, and outcome of specific demonstration programs. Researchers work with prevention professionals to describe, measure, and intensify effects of interventions upon both intermediate problems and the ultimate long-term goal of decreasing substance abuse. Chapters in Substance Abuse Prevention in Multicultural Communities demonstrate how the CSAP demonstration logic model works. The process of prevention program design begins with an analysis of the root causes of the problem as defined by the specific community and illuminated by theory. Comprehensive prevention programs that buttress community strengths and build on local resources are then designed to deal with these problems. The programs you 'll learn from include: a leadership and substance abuse prevention program, based on the social influence model, for girls in grades 6-8 from four geographically and ethnically diverse communities a program intricately designed to build resiliency and protective factors within young at-risk American Indian children in a Head Start program which addresses school transition, school readiness, school attendance, and classroom-based prevention activities. a family skills training program for African American parents in substance abuse treatment, which evolved in response to client and evaluation feedback a program for Native American families, which uses a culturally oriented curriculum emphasizing traditional values, beliefs, and practices a coalition of neighborhood agencies, organized to provide a comprehensive array of school and community-based prevention services, which impacted gang membership in inner-city Latino youth. a prevention program specifically designed to serve the diverse needs of Asian-American youth from five different Asian ethnic communities a model substance abuse prevention program implemented to provide counseling, mentoring, and academic support to Hispanic and African-American students in an urban public middle school the nationally recognized FAST program which strengthens the family and brings parents and schools together in building up protective factors for high risk elementary students a program that combines several complementary strategies to develop personal and communal empowerment in Native American communities. Substance Abuse Prevention in Multicultural Communities illustrates the wealth of information generated by demonstration programs. Unlike a standard research protocol that imposes and tests a rigid, single-focused intervention under carefully controlled circumstances, these programs do science in real-life situations, documenting and measuring effects of multiple interventions.

Encyclopedia of Substance Abuse Prevention, Treatment, and Recovery Dec 26 2021 This collection provides authoritative coverage of neurobiology of addiction, models of addiction, sociocultural perspectives on drug use, family and community factors, prevention theories and techniques, professional issues, the criminal justice system and substance abuse, assessment and diagnosis, and more.

Preventing Substance Abuse Mar 17 2021 Preventing Substance Abuse is an informal guide to successful programs for treating specific substance abuse problems, identifying their origins, implementation, outcomes, and, where possible, contacts for obtaining additional information. The emphasis is on information documented from outcomes of successful interventions rather than on theories of what should work or what works under

experimental conditions. Key features include easy-to-follow charts and graphs and an appendix summarizing the National Structured Evaluation (mandated by Congress) of substance abuse prevention.

Child Abuse Prevention Handbook Sep 30 2019

Trauma-Informed Schools Nov 12 2020 This book provides an interdisciplinary framework for school intervention into child and adolescent maltreatment, highlighting the unique potential for schools to identify and mitigate the long-term impacts of childhood trauma on children's educational well-being. Contributors evaluate recent efforts to incorporate trauma-informed approaches into schools, including strategic planning by administrators, staff training, prevention programming, liaising with local youth service agencies, and trauma-sensitive intervention with affected students. Among the topics discussed:• The developmental impact of trauma• The role of schools and teachers in supporting student mental health• Prevention programming to prevent child and adolescent sexual abuse• Education policies to support students with traumatic histories• Responding to childhood trauma at both macro and microsystem levels Trauma-Informed Schools: Integrating Child Maltreatment Prevention, Detection, and Intervention is a valuable resource for child maltreatment researchers, educational and school psychologists, school social workers, students in early childhood and K-12 education, and education policy makers at all levels of government. It offers the necessary guidelines and insights to facilitate better learning for students who have experienced trauma, aiming to improve student well-being both inside and outside the classroom.

Elder Abuse Prevention Nov 24 2021 "I found this book to be informative, well-researched, and well-thought out...The book is an asset to students, scholars, and seasoned practitioners alike." --International Perspectives in Victimology "Lisa Nerenberg provides the first comprehensive look at elder abuse prevention trends and strategies. Drawing from existing models and examining salient factors, she outlines approaches to intervention that consider victims and perpetrators and engage communities and service systems. She also offers meaningful response to the many challenges endemic to elder abuse work. As a result, Lisa gives hope to the field." "Beginning as a grassroots advocate a quarter century ago in San Francisco, Lisa developed and tested many viable elder abuse prevention programs herself through the local elder abuse network before exploring best practices elsewhere. This unique evolution and perspective gives her the depth and breadth of understanding needed to write a book like this, able to resonate equally with adult protective service workers struggling to manage caseloads of vulnerable elders, law enforcement personnel trying to prosecute abusers, and academics searching for effective responses to the problem."-- --Georgia J. Anetzberger, PhD, ACSW Assistant Professor of Health Care Administration at Cleveland State University and Editor of the Journal of Elder Abuse & Neglect Recipient of the Legal Assistance for Seniors' "Leading the Fight for Seniors' Rights" annual award for 2007! Drawing from over twenty years of experience helping communities improve their response to elder abuse, Lisa Nerenberg describes what agencies, communities, tribes, states, and national organizations are doing to prevent abuse, treat its effects, and ensure justice. She further explores what remains to be done and offers a plan for the future. In doing so, she addresses the broader challenges of fortifying the long-term care, protective service, and legal systems to meet the new and imminent demands of a burgeoning elderly population. In short, the book is about making communities safer places to grow old. Ms. Nerenberg begins by exploring trends that have shaped or defined practice in the field of elder abuse prevention including the Supreme Court's Olmstead decision; a shift in focus from protecting to empowering victims; an increasingly multicultural elderly population; the "globalization" of the field; and heightened understanding of the "psychology of victimization" (or why victims do what they do and perhaps more importantly, why they often don't do what professionals think they should). She further describes eight models and theories on which practice has been based ranging from the widely recognized adult protective service and domestic violence prevention models to lesser-known approaches such as the family preservation and restorative justice models. She describes specific interventions and approaches that each model has contributed, their benefits and limitations, what is known about their impact, and factors that dictate what responses are appropriate to specific settings and situations. In addition to describing techniques used by individual practitioners, the author outlines strategies and services that agencies, communities, states, tribes,

courts, and national organizations have designed, which include elder forensics centers, elder courts, family justice centers, elder shelters, "hybrid" multidisciplinary teams, fraud prevention programs, support groups, restorative justice programs, and culturally specific outreach campaigns. She details progressive public policy initiatives, which range from statutes that provide for the mandatory reporting of deaths in nursing homes, to efforts to improve the collection and distribution of restitution, to laws that address the role of undue influence in elder abuse.

Childhood and Chemical Abuse Jul 21 2021 Childhood and Chemical Abuse highlights the most recent prevention and intervention strategies for fighting substance abuse among children and adolescents. The contributors--all experienced researchers and service providers in the chemical abuse field--clarify the negative impact that substance abusers can have on the health, welfare, and productivity of others, document the increased risk of becoming substance abusers that children of substance abusers face, and examine the major causes and correlates of chemical dependency in youth. The issues, research, and strategies within this exciting book provide a grounded and practical direction for the implementation of prevention and intervention techniques in the addiction process.

My Body's Mine Sep 03 2022 My Body's Mine helps children learn they have the rights to their body. Told through rhyme from a child's point of view, this book on boundaries empowers a child to say no when others approach him or her in ways that make them uncomfortable. It also gives clear instructions on what to do if they are approached in an unwanted manner. The questions at the end of the book provide an easy transition for counselors and parents to open a discussion, assisting the child in understanding and practicing body boundaries or further exploring if abuse has occurred. Through the use of this book, I have experienced families being able to openly discuss abuse together for the first time. Kayla's heart for children from hard places is infectious. Her vision for all children to know they are not alone is unfolding in this new book. She is a gifted writer who will continue to create works benefiting children. My Body's Mine was a missing piece of literature in abuse prevention and I am so thankful to Kayla for writing it! Jessica Kilpatrick, M.A., LPG, STARRY

Oxford Textbook of Violence Prevention Jan 27 2022 'Oxford Textbook Violence Prevention' brings together an international team of experts to provide an extensive global account of the global mortality and morbidity burden caused by violence through examining the causes of violence, and what can be done to prevent and reduce violence.

The Educator's Guide To Substance Abuse Prevention Sep 22 2021 The Educator's Guide to Substance Abuse Prevention is for educators and other school personnel who are concerned about student drug use and school violence. It will help them to appreciate and use their humanity, professional skills, educational ideals, and the school curriculum as tools for substance abuse prevention. Teachers' concerns are addressed in several ways. First, the text provides a guide through which they may resolve personal and professional concerns about the commitments, limits, and boundaries of their working relationships with students. Second, it describes tasks that teachers can perform and mental health issues they can address in creating classroom policies, procedures, and rules to promote healthful learning activity in the classroom. Third, the author summarizes and interprets research and theory about substance abuse as they apply specifically to educational prevention and to professional teaching practice--arguing that classroom management strategies, learning activities, and social interaction are a teacher's primary tools of prevention, and showing how teachers may use these tools in any curricular area and without direct reference to drugs. A highlight of this text is its emphasis on helping teachers to explore drug-related issues from within the context of their own curricular specialties and to integrate substance abuse prevention with the curriculum in many school subjects--including the arts, literature, social studies, history, government, science, and culture. Action-oriented prevention strategies based on these content areas are suggested. The Educator's Guide to Substance Abuse Prevention: *focuses primarily on teaching, learning, and prevention rather than on information about drugs; *helps teachers to better use what they already do, know, and are in order to respond competently, responsibly, and with sensitivity to the needs of their students; *attends to the needs of teachers who do prevention work and the needs of children who are the target of prevention efforts; *describes student disappointment and disillusionment with family, school, and community as sources of risk and the legitimate domain in which teachers may serve a curative role; *provides extensive coverage of historical, social, and cultural issues related to substance abuse and school violence; and *alerts teachers to the risk to children posed by extremist adult groups, prominent negative role models, popular culture, and peer pressure.

Child Abuse Prevention and Treatment in the 1990s Keeping Old Promises, Meeting New Demands Jan 03 2020 Testimony on the topic of child abuse prevention and treatment is presented in this document. After an opening

statement by Representative Patricia Schroeder of Colorado, testimony and supplemental materials by these persons are included: (1) Marilyn Van Derbur, motivational lecturer, Denver, Colorado; (2) Barry Bennett, program manager, innovative treatment programs, division of adult, child, and family services, Iowa Department of Human Resources, Des Moines, Iowa; (3) Cresson Carrasco, parent-infant psychotherapist, community infant project, Mental Health Center of Boulder County, Boulder, Colorado; (4) David Espinoza, executive director, La Causa Day Care Center, Inc., Milwaukee, Wisconsin; (5) Wade Horn, commissioner, Administrator for Children, Youth, and Families, U.S. Department of Human Services, accompanied by David Lloyd, director, National Center on Child Abuse and Neglect, U.S. Department of Health and Human Services, Washington, District of Columbia; (6) Richard D. Krugman, chairperson, U.S. Advisory Board on Child Abuse and Neglect, Denver, Colorado; (7) Nora (J. Baladerian, licensed psychologist, chair, State Task Force on Disability, director, Disability Project of SPECTRUM Institute; (8) George Batsche, National Association of School Psychologists, Silver Spring, Maryland; (9) David Lloyd, director, National Center on Child Abuse and Neglect, Department of Health and Human Services, Washington, District of Columbia; (10) Belva Morrison, director, Indian Child Welfare Program/DIHFS, Denver, Colorado; (11) Steven J. Murphy, director, Hillsdale County, Michigan Department of Social Services; (12) New Beginnings, Integrated Services for Children and Families, San Diego, California; and (13) Milan Rewerts, interim director, Colorado State University cooperative extension child abuse prevention programs. Drug Abuse Prevention Nov 05 2022 Using an evidence-based approach, Drug Abuse Prevention: A School and Community Partnership, Third Edition teaches students and practitioners the important concepts and skills needed to design effective drug prevention programs. Written to cover more than just the facts about drugs, this text provides a background of drug use and abuse, presents the principles and skills of prevention, with particular focus on adolescents and school settings, and reinforces the importance of schools forming community partnerships with key institutions and the application of policy tools to enhance the impact of education alone.

Special Action Office for Drug Abuse Prevention Dec 14 2020

Substance Abuse Prevention Aug 02 2022 Analyses the: meaning and dynamics of multiculturalism affecting prevention intervention, relative risks and knowledge gaps across ethnic groups, social trends affecting health risks and substance abuse, lessons learned from substance abuse research and prevention, role of the media, and promises and limits of the public health paradigm.

Theory-Based Approaches to Substance Misuse and Abuse Prevention in School Apr 17 2021 Youth substance use and misuse are still highly common, despite substantial efforts made to reduce the problem. Early start with substance use is often associated with more severe short- and long-term negative consequences for youth psycho-social adjustment. Bringing together international experts in the areas of prevention, health, and developmental science, this volume presents the most up-to-date knowledge about etiology (e.g., risk and protective factors) of substance use behaviors and the most effective interventions that can be implemented in the school setting. It also presents current hot topics in the field, such as: The importance of implementation fidelity for the success of the program The need to find effective ways to disseminate evidence based interventions and to understand whether those interventions are, in fact, cost effective. Taken together, these articles shed a light on what has been done and what still needs to be done to combat substance use among youth and suggest new theoretical perspectives and new practical approaches to address the problem. This is the 141st volume of New Directions for Youth Development, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions.
