Secondary School External Examination Systems Mar 16 2021 Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A-Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives, as their outcomes are principal determinants of young people's future prospects. These examinations are external--they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as 'blind' arbiters of student achievement, providing the proverbial 'level playing field' which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters, regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up, from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever-higher social demand for access to higher levels of formal education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems (including the modification and, in some instances, abandonment of external examinations). This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies, which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of 'external examinations beyond national borders', including a contribution by the International Baccalaureate Organisation. A defining feature of the work is the attention it pays to what it calls the 'nuts and bolts' of external examinations, from question-setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons--it is accessible to teachers and interested laypeople, as well as to academics."

*Public Examinations Examined* Nov 04 2022 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations,

identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

**China's Examination Hell** Aug 01 2022 Written by one of the foremost historians of Chinese institutions, this book focuses on China's civil service examination system in its final and most elaborate phase during the Ch'ing dynasty. All aspects of this labyrinthine system are explored: the types of questions, the style and form in which they were to be answered, the problem of cheating, and the psychological and financial burdens of the candidates, the rewards of the successful and the plight of those who failed. Drawing on a wide range of sources, including Chinese novels, short stories, and plays, this thought provoking and entertaining book brings to vivid life the testing structure that supplied China's government bureaucracy for almost fourteen hundred years.

"Professor Miyazaki's informative work is concerned with a system. . . that was, in effect, . . . the basic institution of Chinese political life, the real pillar which supported the imperial monarchy, the effective vehicle for the aspirations and ambitions of the ruling class. Imperial China without the examination system for the past thousand years and more would have developed in an entirely different way and might not have endured as the continuing form of government over a huge empire."--Pacific Affairs "The most comprehensive narrative treatment in any language of [this] enduring achievement of Chinese civilization."--American Historical Review

*Examination Physical Education* Sep 21 2021 In recent decades physical education has moved from the margins, redefining itself as an academic subject. An important component of this transformation has been the introduction of high-stakes examinations at key points in a student's school career and the emergence of 'examination physical education' as the dominant paradigm in many educational systems around the world. This book is the first to explore the growing international literature on examination physical education and draw on research to extend the political, academic and professional debates around the subject to explore its limitations and possibilities. Addressing key topics such as curriculum development, assessment methods, and teacher education, it seeks to assess how our existing knowledge of examination physical education can be best translated into pedagogical practice in the classroom. Complementing other texts in the Routledge Studies in Physical Education and Youth Sport Series, it makes an original and informed contribution to current discussions of physical education. *Examination Physical Education: Policy, Practice and Possibilities* is important reading for any student, researcher or teacher educator with an interest in physical education, sports pedagogy and education policy.

**The White Book of Neurologic Examination** Jun 30 2022 The neurologic examination is often viewed as a daunting monstrosity, byzantine in nature, complex to teach and cumbersome to learn. However, neurologic conditions are not uncommon in GP and hospital practice, and a grounded understanding of pertinent neurologic symptoms, signs and conditions is absolutely vital. This book serves to demystify the seemingly convoluted processes behind the neurologic examination, with chapters focussing on bringing the reader back to the basics, breaking complicated techniques down into its individual steps, supplemented by clear and concise explanation of neurologic principles. The book discusses neurologic signs and symptoms commonly encountered in our daily practice, with flow-charts, pictures and tables to help the reader learn, shape and build a solid foundation in neurology. Tips from examiner and specific case examples are included to improve the reader's grasp of the topics. This easy-to-read guidebook is essential for all medical students and physicians seeking to prepare for their professional examinations, to improve on their care of our patients, or simply to understand the wonderful inner-workings of neurology a little better. Well written textbooks which focus on neurologic examination and written in a palatable manner for the non-neurologist, are rare and few. They are often admixed with other non-neurologic topics (e.g. respiratory, cardiac or abdominal examination), with superficial and cursory discussion of neurologic

conditions. At the other end of the spectrum, neurology textbooks are often written in a manner better suited to neurologists than to non-neurologists, struggling to better understand the basic concepts. In my years of teaching students from all 3 local medical schools studying for their undergraduate medical degrees, and medical officers preparing for the MRCP PACES examination, a common problem they encountered was the lack of a palatable yet informative neurologic text which helps them understand the concepts without murdering their interest in the topic. I believe this book serves to fill that gap, and to hopefully better prepare our doctors in their careers, and to nurture their love and interest in this subject I so love.

*Praxis II World and US History Rapid Review Study Guide Sep 09 2020*

*World Sep 02 2022* What do we mean when we refer to the world? How does the world relate to the human person? Are the two interdependent and, if so, in what way? What does the world mean for the ethnographer and the anthropologist? Much has been said of worlds and worldviews, but are we really certain we know what we mean when we use these words? Asking these questions and many more, this book explores the conditions of possibility for the ethnographic gesture and how those possibilities can shed light on the relationship between humans and the world in which they are found. As Joao de Pina-Cabral shows, important changes have occurred over the past decades concerning the way in which we relate the way we think to the way we are as a humanity embodied. Exploring new confrontations with a new conceptualization of the human condition, Cabral sketches a new anthropology, one that contributes to an ongoing separation from the socio-centric and representationalist constraints that have plagued the social sciences over the past century.
