**The Return of Politics** Dec 14 2020 By the spring of 1998, it had become clear that Italy, after considerable effort, had succeeded in bringing its public finances into line with the Maastricht parameters for joining the European Monetary Union. This was generally viewed as an important success of the Olive Tree coalition government led by Romano Prodi, and a sign that Italian political life had become "normal." Nevertheless, the Bicameral Commission, which should have fostered a radical constitutional reform with the aim to stabilize and strengthen the bipolar structure of the party system and the majoritarian functioning of democracy in Italy, was dismantled in June. Moreover, in October 1998 the Prodi government suddenly collapsed because of the internal opposition of the Neo-Communist wing of its parliamentary majority, a further demonstration that the Italian transition towards a more effective democratic rule is far from complete. David Hine is Fellow and Senior Censor at Christ Church College, Oxford. Salvatore Vassallo is senior civil servant in the Emilia-Romagna regional government's Institutional Affairs Bureau and Professor of Public Policy Analysis at the University of Trento.

*European Banking Nationalism* Aug 02 2022 This book compares the different expressions of, and outcomes from, banking nationalism in two European countries to draw wider conclusions about the consequences for Banking Union in Europe and to show how national governments deal (or fail to deal) with international commitments. It reveals how and why one case - Spain - managed to tackle failing banks within EU Banking Union regulations even before they became written in EU law, while the other - Italy - had more persistent problems. The book argues that Spain demonstrates a successful case of liberal economic nationalism, typified by aggressive,

early state intervention to restructure Spanish banks, and help from the European Stability Mechanism even in the face of local political opposition. Italy, meanwhile, suffered from the weaker, delayed intervention which forced it to confront European institutions with demands for special treatment as a means of externalizing its own internal weakness. This book will be of key interest to scholars, students and professionals in economic policy, Economic and Monetary Union and Banking Union in Europe, European and global governance, European/EU studies, European public policy, European public administration and EU law, as well as professionals working in the banking sector.

[Internationalisation and Economic Institutions](#) Jul 29 2019 This book examines how and why internationalisation of markets affect economic institutions. Its arguments relate to major debates in comparative politics, international relations, globalisation, political economy and regulation. It is also relevant for business studies and law.

*Accepting the evidence (The world I'd like)* *Abridged* Apr 05 2020 This book is the abridged version of two essays of about 500 pages I published in Italian in 2021, denouncing the success of the élite able to seize everywhere more and more power promoting globalization. And then to earn mountains of money directing public spendings. Since reading (as well as translating) 500 pages is challenging, I summarize here their main concepts in just 70 (an Italian version is also available). To achieve this, I speak only of climate and pandemic alarmism as examples of unjustified and huge public spending enriching the élite. And of globalization, of course. Much debated issues but also little known to many who prefer to

accept with confidence analyzes and solutions of media storytellers. A trust that, citing public information and scientific sources (the bibliography is another 19 pages), I'll show misplaced since they are only dishonest pro-élite lobbyists as they never declare to be such. **There Are Places in the World Where Rules Are Less Important Than Kindness** Jul 09 2020 A delightful intellectual feast from the bestselling author of *Seven Brief Lessons on Physics* and *The Order of Time* One of the world's most prominent physicists and fearless free spirit, Carlo Rovelli is also a masterful storyteller. His bestselling books have introduced millions of readers to the wonders of modern physics and his singular perspective on the cosmos. This new collection of essays reveals a curious intellect always on the move. Rovelli invites us on an accessible and enlightening voyage through science, literature, philosophy, and politics. Written with his usual clarity and wit, this journey ranges widely across time and space: from Newton's alchemy to Einstein's mistakes, from Nabokov's lepidopterology to Dante's cosmology, from mind-altering psychedelic substances to the meaning of atheism, from the future of physics to the power of uncertainty. Charming, pithy, and elegant, this book is the perfect gateway to the universe of one of the most influential minds of our age.

*Income dispersion and economic crises* Apr 29 2022 Current economic theories do not provide the elements to understand the causes and processes that provoke economic crises. In this book, Maurizio Pasquino explains the underlying reasons and introduces the new concept of income dispersion. Income dispersion provides a much broader vision of how an economic system works, setting the bases for a more efficient way of identifying and resolving the problems of the society in which we live today.

**Regulatory Reforms in Italy: A Case Study in Europeanisation** Jul 01 2022 This title was first published in 2001. The question this thesis attempts to answer is summarized as follows: what accounts for the amazing stability of Italian transport policy in the face of European challenges, given the fact that - as most national and European policy-makers readily believe - it is not capable of addressing the problem of the sector? This study analyzes the transport policy in Italy from the 1990s into the 21st century. It looks at how the two sub-sectors of surface transport, road haulage and railways, have been managed by the public and private actors involved. In both sectors the policy appears to have failed, either by not offering a remedy to problems or by aggravating them further. The author believes that studying transport policy in Italy will shed light on the wider question of how national policy-making patterns are influenced by developments in the international environment; in this case looking closely at the influence of the European Union.

*Organizations and the Media* Jan 27 2022 The relationship between media and the organizations they cover has changed dramatically in the last few decades, which have witnessed a huge expansion of news coverage focusing on different types of organizations and their activities. In parallel, organizations have dramatically increased their investment in public relations and other media-oriented forms of communication. Like other societal developments - globalization, marketization, individualization, scientification - mediatization has become an institutional force. This book analyses the mediatization of contemporary organizations and how individual organizations, industry or markets are scrutinized. It examines its key influence on the actions of organizations, and how it shapes the entire landscape in which the organizations operate. What such a perspective provides is the accentuation of the interplay between organizations and different parts of the society as embedded in the media and its logic. This will be essential reading for professionals, academics and advanced students in organizational studies, public relations and media studies.

*Italy and the European Union* Mar 05 2020

Federiga Bindi provides, for the first time, an in-depth analysis of Italy's role within the European Union (EU) in this inaugural volume of a book series published jointly by the Brookings Institution Press and the Scuola Superiore della Pubblica Amministrazione (Italian National School of Public Administration, or SSPA). Italy and the European Union relates in detail the historical, cultural, and sociological factors that have led to Italy's incomplete "Europeanization," or full integration, within the EU. It also brings the reader up-to-date on the steps taken by the country's leaders to improve Italy's standing and become a more effective member in the organization it helped to found. Discussing the author's extensive research, *The Economist*

notes.... "Federiga Bindi identified a number of barriers to an effective European policy in Italy: a high turnover of governments; coalition partners with conflicting aims; the failure of bureaucrats to learn from other member states; and politicians' lack of interest in Europe... recently however, she found that matters had improved. An interdepartmental body for the coordination of EU policies has been created, Parliament operates an effective scrutiny system..., the administration has learnt to learn from others. But the other problems remain, and they are formidable. Her study ends on an exasperated note: 'Italy appears to be stuck in the age of the Guelphs and the Ghibellines, in which the victory of one faction over another is what counts, and the fact that this may be damaging to the country matters little.'" —from *The Economist*, July 31, 2010

Italy in the European Union Jul 21 2021 Based on an analytical evaluation of both the weaknesses and strengths of the Italian political system, *Italy in the European Union* is the first book to offer a detailed and comprehensive description of Italy's contribution to European Union policy-making across a wide range of policies. Combining empirical investigation and theoretical analysis, it functions on two levels: as a nuanced picture of Italy's role in the EU and as a study of the EU as it has been transformed by subsequent waves of enlargement.
