Vertebrate Land Fossils 138 pages. Full color. Over 300 photos and illustrations. *Guide to Fossil Man* Jun 19 2021 Michael H. Day's Guide to Fossil Man is the standard reference work on hominid remains found at the major palaeolithic sites throughout the world. This fourth edition now includes details of fifteen new sites, as well as new evidence from thirty-four previously known sites featured in earlier editions of the book. Day begins with an introduction to the anatomy of human fossils. He then describes the forty-nine sites in Europe, the Near East, Africa, the Middle East, Asia, and Oceania that have yielded the most significant information on the development of hominid species and the appearance of early man. Grouped geographically, each site description includes data on the hominid remains, other finds such as tools and animal bones, the local geology and contemporary geomorphology and ecology, and dating and other references. Sites featured for the first time in this edition include Kow Swamp and Mungo in Australia; Dali and Maba in China; and West Turkana in Kenya, which contained the almost complete skeleton of a boy determined to be 1,600,000 years old. Short essays on problems associated with neandertal, australpithecine, and Homo erectus remains are included, as well as a glossary, a geological time scale, charts and comprehensive illustrations. Day's Guide to Fossil Man is invaluable not

only for working palaeontologists, palaeolithic archaeologists, and physical anthropologists, but also for anyone interested in human evolution.

Buy this book at your own risk. It will destroy your illusions, but may haunt you in your dreams. It will tell you why fossil hunting is worth your time, but why you never get rich with it. It will tell you how to swing your hammer and why you have to keep an open ear when collecting close to a

quarry wall. It will tell you how to collect with your children and why it is a bad idea to dig for dinosaurs in Alberta. You will learn that your old dividers from school are excellent preparation tools and that putting a name on a fossil is the least important thing you have to worry about. Stay away if you mind occasional mature language and political incorrectness. Get it when you want a short guide to fossil collecting and you have really absolutely no idea how to start with it.

But Like Maybe Don't? Sep 22 2021 The creator of the Instagram sensation *But Like Maybe* takes us on an illustrated journey through her worst dating mistakes—a hilarious, hopeful guide to what you need to get wrong in love before you get it right. Arianna Margulis's pen was set aflame when a boyfriend took her for a

walk in Central Park. She was sneak-attack dumped because she "interfered with his meditation schedule." After a few sobs, she found her way to a Sharpie, doodled the hilarity and the heartbreak, and *But Like Maybe* was born. As her cartoons became an Instagram cult hit, Arianna chronicled her misadventures through modern love via a crop-topped doppelganger, equal parts optimistic and anxious, who holds tight to the belief that bae is out there. Now, with 70 never-before-seen toons, her first book is a witty and winning primer on what not to do when dating. Inspired by all the ways Arianna's gone wrong in her search for love, from planning matching outfits with her high school boyfriend without his knowledge to deplaning an aircraft because her crush texted, this charming and off-kilter anti-guide gently leads you to what matters: realizing that you're already pretty awesome. With plenty of advice for recognizing and moving on when he's just not that into you, Arianna shows how to not let a read receipt ruin your night, what to do when the slow fade commences, and how to flip the busy script on a guy. Dating can make the best of us a bit crazy. Keep this guide by your side so that the next time tequila urges you to text your ex, you can instead tell yourself . . . but like maybe don't.

Fantastic Fossils

Aug 22 2021

Nothing fills us with a sense of wonder like fossils. What looks at first like a simple rock is in fact a clue that reveals the staggering diversity of ancient environments, the winding pathways of evolution, and the majesty of a vanished earth. But as much as one might daydream of digging a hole in the backyard and finding a Tyrannosaurus, only a few places contain these buried treasures, and when a scientist comes across a remnant of prehistoric life, great care must be taken. What do budding paleontologists need to know before starting their search? In *Fantastic Fossils*, Donald R. Prothero offers an accessible, entertaining, and richly illustrated guide to the paleontologist's journey. He details the best places to look for fossils, the art of how to

find them, and how to classify the major types. Prothero provides expert wisdom about typical fossils that an average person can hope to collect and how to hunt fossils responsibly and ethically. He also explores the lessons that both common and rarer discoveries offer about paleontology and its history, as well as what fossils can tell us about past climates and present climate change. Captivating illustrations by the paleoartist Mary Persis Williams bring to life hundreds of important specimens. Offering valuable lessons for armchair enthusiasts and paleontology students alike, *Fantastic Fossils* is an essential companion for all readers who have ever dreamed of going in search of traces of a lost world. *My Book of Fossils* Apr 17 2021 Unearth hidden fossils and unleash a new love for all things prehistoric!
