Pathmakers Dec 14 2020 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price while supplies last Documents the history and significance of the trail system on Mount Desert Island, Maine. Many of Acadia National Park's foot trails preceded the establishment of the park. The earliest pathmakers were Abenakis, who made trails for carrying canoes between lakes and for other practical reasons. European settlers later developed recreation trails. Summer visitors organized Village Improvement Associations and Village Improvement Societies, whose path committee volunteers created trails that were incorporated, in 1916, into the new Sieur de Monts National Monument, precursor to Lafayette National Park (1919). Ten years later, the protected area was renamed Acadia National Park. It was the first national park to have sprung full-blown from philanthropy. Volunteers and park crews, including President Franklin D. Roosevelt's Civilian Conservation Corps in the 1930s and early 1940s, expanded and maintained the trail system. Friends of Acadia was formed in 1986 to extend the philanthropic vision of the park founders. The organization later mounted Acadia Trails Forever, which matched \$4 million in park entry fees with \$9 million in private donations, to rehabilitate the footpaths over ten years. The model project made Acadia the first national park with an endowed trail system. Each era of trail building and its individual pathmakers utilized different construction styles, standards and aesthetic nuances. The job of today's professional trail crew and its legion of volunteers is to honor the pathmakers of old by replicating their construction signatures whenever possible. National parks, after all, are repositories of history and culture, and the Park Service's legal duty of care is to preserve these magnificent places "unimpaired for the use and enjoyment of future generations." Three important books guide Acadia's trail crews in that obligation: Preserving Historic Trails, the proceedings from an October 2000 conference of trail building experts from across the nation; this volume, Pathmakers: Cultural Landscape Report for the Historic Hiking Trail System of Acadia National Park (2005), a profusely illustrated history of trail building; and the second volume of the cultural landscape report, Acadia Trails Treatment Plan (2005), which lays out precise construction and maintenance techniques favoring the historically faithful preservation of Acadia's footpaths. These authoritative resources, and the park's Hiking Trails Management Plan, were compiled with input from one of the best kept secrets in the National Park Service, the Olmsted Center for Landscape Preservation, a coterie of landscape architects, historians and writers tucked away in Brookline, Massachusetts. The Olmsted staff collaborated over several years with Acadia's trail crew, one of the best in the 388-unit National Park System. Each year, the Acadia Trails Forever project brings more trails up to the rehabilitation standards set forth in the cultural landscape report. Previously neglected features such as iron work, granite steps, bog bridges, log stringers, water bars, rock drains. Bates-style cairns and other historic features are carefully redone or added, complementing Acadia's natural splendor. Audience Environmentalists, Historians, Educators, and Students would find it interesting to learn about the history of Acadia National Park and the people that work to preserve it. Alcatel-Lucent Service Routing Architect (SRA) Self-Study Guide Apr 29 2022 A comprehensive resource for professionals preparing for Alcatel-Lucent Service Routing Architect (SRA) certification Networking professionals are taking note of Alcatel-Lucent and its quick ascent in the networking and telecom industries. IP networking professionals looking for a comprehensive guide to obtaining the Alcatel-Lucent Service Routing Architect (SRA) certification will be pleased to learn of this new publication, Alcatel-Lucent Service Routing Architect (SRA) Self-Study Guide: Preparing for the BGP, VPRN and Multicast Exams. The book comprises approximately 2,100 pages of print and additional online content, making it the foremost resource for those looking to make themselves IP subject matter experts. In this impressive resource, readers will find detailed information to prepare them for various sections of the Service Routing Architect certification, and to familiarize them with topics and learning material for three of the SRA written exams. Pre- and post-chapter assessment questions, sample written exam questions, and valuable lab exercises ensure that readers will gain knowledge and develop strategies for successfully obtaining certification. Other highlights of the book include: Offers a comprehensive look at certification topics through 1,200 pages of printed content and an additional 900 pages of authoritative online information Provides strategies for troubleshooting complex network problems Serves as the premier resource for Service Routing Architect certification—similar books do not offer this level of detail Alcatel-Lucent Service Routing Architect (SRA) Self-Study Guide: Preparing for the BGP, VPRN and Multicast Exams has been developed for industry professionals working in network environments where Alcatel-Lucent products are deployed, and for industry professionals with Cisco and Juniper certifications looking to expand their knowledge and skill base. Engineers and networking professionals with an SRA certification from Alcatel-Lucent will be in high demand. Let this must-have learning resource prepare you for success!

Monopolized Aug 29 2019 From the airlines we fly to the food we eat, how a tiny group of corporations have come to dominate every aspect of our lives—by one of our most intrepid and accomplished journalists "If you're looking for a book . . . that will get your heart pumping and your blood boiling and that will remind you why we're in these fights—add this one to your list." —Senator Elizabeth Warren on David Dayen's Chain of Title Over the last forty years our choices have narrowed, our opportunities have shrunk, and our lives have become governed by a handful of very large and very powerful corporations. Today, practically everything we buy, everywhere we shop, and every service we secure comes from a heavily concentrated market. This is a world where four major banks control most of our money, four airlines shuttle most of us around the country, and four major cell phone providers connect most of our communications. If you are sick you can go to one of three main pharmacies to fill your prescription, and if you end up in a hospital almost every accessory to heal you comes from one of a handful of large medical suppliers. Dayen, the editor of the American Prospect and author of the acclaimed Chain of Title, provides a riveting account of what it means to live in this new age of monopoly and how we might resist this corporate hegemony. Through vignettes and vivid case studies Dayen shows how these monopolies have transformed us, inverted us, and truly changed our lives, at the same time providing readers with the raw material to make monopoly a consequential issue in American life and revive a long-dormant antitrust movement.

Beyond VoIP Protocols Feb 13 2021 In 1999-2000, VoIP (Voice-over-IP) telephony was one of the most successful buzzwords of the telecom bubble era. However, in 2001-2003, VoIP faced a very tough reality check. Now, manufacturers and service providers are drawing on what they have learnt from past experience in order to prepare to participate in the next major challenge faced by the telecommunications industry. This book offers a comprehensive overview of the issues to solve in order to deploy global revenue-generating effective "multimedia" services. Drawing on extensive research and practical deployment experience in VoIP, the authors provide essential advice for those seeking to design and implement a post-bubble VoIP network. Beyond VoIP Protocols: Understanding Voice Technology and Networking Techniques for IP Telephony Introduces the basics of speech coding and voice quality Demonstrates how quality of service may be built into the network and deals with dimensioning aspects, e.g. multipoint communications and how to model call seizures. Explores the potential of multicast to turn an IP backbone into an optimized broadcast medium Includes amply illustrated, state-of-the-art practical advice for formulating a complete deployment strategy A companion volume to "IP Telephony: Deploying VoIP Protocols", this book takes the reader a stage deeper into how to prepare the network and exploit VoIP technology to its full potential.

Juniper Networks Reference Guide Feb 25 2022 Detailed examples and case studies make this the ideal hands-on guide to implementing Juniper Networks systems. It contains something for everyone, and covers all the basics for beginners while challenging experience users with tested configuration examples throughout the book.

Automotive Global Value Chain Sep 22 2021 Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of

acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

Raising Grateful Kids in an Entitled World Sep 30 2019 "But everyone else has it." "If you loved me, you'd get it for me!" When you hear these comments from your kids, it can be tough not to cave. You love your children—don't you want them to be happy and to fit in? Kristen Welch knows firsthand it's not that easy. In fact, she's found out that when you say yes too often, it's not only hard on your peace of mind and your wallet—it actually puts your kids at long-term risk. In *Raising Grateful Kids in an Entitled World*, Kristen shares the ups and downs in her own family's journey of discovering why it's healthiest not to give their kids everything. Teaching them the difference between "want" and "need" is the first step in the right direction. With many practical tips and anecdotes, she shares how to say the ultimate yes as a family by bringing up faith-filled kids who will love God, serve others, and grow into hardworking, fulfilled, and successful adults. It's never too late to raise grateful kids. Get ready to cultivate a spirit of genuine appreciation and create a Jesus-centered home in which your kids don't just say—but mean!—"thank you" for everything they have.

*Academia Next* Jan 03 2020 From the renowned futurist, a look at how current trends will transform American higher education over the next twenty years. 2020 Most Significant Futures Work Award Winner, Association of Professional Futurists The outlook for the future of colleges and universities is uncertain. Financial stresses, changing student populations, and rapidly developing technologies all pose significant challenges to the nation's colleges and universities. In *Academia Next*, futurist and higher education expert Bryan Alexander addresses these evolving trends to better understand higher education's next generation. Alexander first examines current economic, demographic, political, international, and policy developments as they relate to higher education. He also explores internal transformations within postsecondary institutions, including those related to enrollment, access, academic labor, alternative certification, sexual assault, and the changing library, paying particularly close attention to technological changes. Alexander then looks beyond these trends to offer a series of distinct scenarios and practical responses for institutions to consider when combating shrinking enrollments, reduced public support, and the proliferation of technological options. Arguing that the forces he highlights are not speculative but are already in play, Alexander draws on a rich, extensive, and socially engaged body of research to best determine their likeliest outcomes. It is only by taking these trends seriously, he writes, that colleges and universities can improve their chances of survival and growth. An unusually multifaceted approach to American higher education that views institutions as complex organisms, *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow.

*Mastering the VC Game* Jul 09 2020 Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Bussgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups—one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture capitalist helping entrepreneurs bring their dreams to fruition. Bussgang offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, *Mastering the VC Game* will prove invaluable for entrepreneurs seeking capital and successful partnerships.

The Venture Capital Deformation Jul 29 2019 In spite of the robust development of venture capital that has occurred over the last three decades, returns from venture capital have been declining. This book focuses on a simple question: why? The answer lies in the context of multiple deformations that have occurred throughout the venture capital process. The book critically assesses the ways in which interactions between different stakeholders in the venture capital ecosystem change (or "deform") venture capital, decreasing its value. Klonowski also reveals that venture capital actually has few benefits—and some outright disadvantages—for entrepreneurs, and it can create a self-perpetuating cycle of investment and loss for the entire venture capital industry. This is especially true as corporate governance and compensation structures may create significant misalignments, incongruities, and conflicts of interest between general and limited partners.

Purpose & Impact Dec 02 2019 Purpose & Impact is the first book aiming to provide guidance to senior executives and professionals for how to rethink and even relaunch careers that align with wider purpose and societal impact. With our increasing longevity, the concept of retirement is becoming redundant, as executives need, financially, and want, motivationally, to continue to work well beyond what is currently considered 'retirement age'. Around age 50, when we often leave our mainstream employers, we could be looking forward to around 30 healthy years, equivalent to a whole second career. This book, therefore, sets out a topic that is becoming increasingly important and urgent for governments, companies and executives alike. This book is underpinned by research (including interviews with over 90 senior executives) conducted by the author. Many of their stories are interspersed throughout the book to provide the reader with real insight into how very diverse senior executives and professionals created roles that enabled their own personal growth and development and had positive impacts on wider society. In addition, helpful tools and guides are used throughout the book to help the reader in their decision-making processes through the different stages of discovering and developing themselves and their career goals.

Patient Capital Mar 29 2022 How to overcome barriers to the long-term investments that are essential for solving the world's biggest problems There has never been a greater need for long-term investments to tackle the world's most difficult problems, such as climate change, human health, and decaying infrastructure. And it is increasingly unlikely that the public sector will be willing or able to fill this gap. If these critical needs are to be met, the major pools of long-term, patient capital—including pensions, sovereign wealth funds, university endowments, and wealthy individuals and families—will have to play a large role. In this accessible and authoritative account of long-term capital investment, two leading experts on the subject, Victoria Ivashina and Josh Lerner, highlight the significant hurdles facing long-term investors and propose concrete ways to overcome these difficulties.

Sports Media History Feb 02 2020 This research collection explores the ongoing interaction between sports, media, and society throughout important periods in history, from the nineteenth century to the present day. It examines both historical moments and broader trends in sports, with an emphasis on the media's role. Encompassing a variety of research approaches and perspectives, the book looks at the individuals, mass media outlets and communication technologies that have affected societies on a global scale, including print, photography, broadcast (radio and television), Internet-based media, and public relations/marketing. It presents fascinating new case studies covering topics as diverse as sports journalism and the Third Reich, Argentina at the Mexico World Cup, post-9/11 sports reporting, Martina Navratilova and women's tennis, the growth of fantasy sport, and the significance of Joe Louis and Jackie Robinson in the history of US sports reporting. This is essential reading for any researcher, student or media professional with an interest in the relationships between sports, culture, and society or in the history of media, culture, or technology.

Private Equity Review Oct 04 2022 The Private Equity Review, edited by Stephen L Ritchie of Kirkland & Ellis LLP, reflects the fact the market continues to become more geographically diverse, meaning that private equity professionals need guidance from local practitioners about how to raise money and close deals in multiple jurisdictions. With this need in mind, this book contains contributions from leading private equity practitioners in 29 different countries, with observations and advice on private equity deal-making, investing and fundraising in their respective jurisdictions. Contributors include: Iain McMurdo, Maples and Calder; Christian Hoedl, Uria Menendez.

New Frontiers of Philanthropy Aug 10 2020 With the resources of both governments and traditional philanthropy barely growing or in decline, yet the problems of poverty, ill-health and environmental degradation ballooning daily, it is increasingly clear that new models for financing and promoting social and environmental objectives have become urgently needed. Fortunately, however, a significant revolution appears to be underway in the way in which social and environmental purposes are being financed. The heart of this revolution is a massive explosion in the instruments and institutions being deployed to mobilize private resources in support of social and environmental objectives. Where earlier such support was limited to charitable gifts, now a bewildering array of new instruments and institutions has surfaced—loans, loan guarantees, private equity, barter arrangements, social stock exchanges,

bonds, secondary markets, investment funds, and many more—all of them designed to leverage not just the tens of billions of dollars of philanthropic grants but the hundreds of billions, indeed trillions, of dollars of private investment capital. While the changes under way are inspiring and by no means trivial, however, they remain largely uncharted in any systematic fashion. This monograph, and of the companion volume for which it also serves as the introductory chapter, is designed to overcome this problem, to provide the first comprehensible and accessible roadmap to the full range of important new developments taking place on the frontiers of philanthropy and social investment. In the process, it seeks to broaden awareness of these developments, increase their credence and traction, and make it possible to maximize the benefits they can generate while acknowledging the limitations and challenges they also face.

Start-Up Creation Mar 05 2020 Start-Up Creation: The Smart Eco-efficient Built Environment provides a state-of-the-art review on high-technology applications and explains how these can be applied to improve the eco-efficiency of the built environment. Divided into four main parts, the book explains the key factors behind successful startup companies that grow from university research, including the development of a business plan, the importance of intellectual property, necessary entrepreneurial skills, and innovative thinking. Part Two presents the latest research findings on nano and bio-based technologies and their application and use to the energy efficiency of the built environment. Part Three focuses on the use of genetic algorithms, Big Data, and the Internet of Things applications. Finally, the book ends with an entire section dedicated to App development using selected case studies that illustrate their application and use for monitoring building energy-efficiency. Presents a definitive guide for startups that arise from college and university research, and how the application of advanced technologies can be applied to the built environment Includes case studies on new advanced technologies and apps development Links startup creation to the eco-efficient built environment through software applications

Private Equity at Work May 19 2021 Private equity firms have long been at the center of public debates on the impact of the financial sector on Main Street companies. Are these firms financial innovators that save failing businesses or financial predators that bankrupt otherwise healthy companies and destroy jobs? The first comprehensive examination of this topic, *Private Equity at Work* provides a detailed yet accessible guide to this controversial business model. Economist Eileen Appelbaum and Professor Rosemary Batt carefully evaluate the evidence—including original case studies and interviews, legal documents, bankruptcy proceedings, media coverage, and existing academic scholarship—to demonstrate the effects of private equity on American businesses and workers. They document that while private equity firms have had positive effects on the operations and growth of small and mid-sized companies and in turning around failing companies, the interventions of private equity more often than not lead to significant negative consequences for many businesses and workers. Prior research on private equity has focused almost exclusively on the financial performance of private equity funds and the returns to their investors. *Private Equity at Work* provides a new roadmap to the largely hidden internal operations of these firms, showing how their business strategies disproportionately benefit the partners in private equity firms at the expense of other stakeholders and taxpayers. In the 1980s, leveraged buyouts by private equity firms saw high returns and were widely considered the solution to corporate wastefulness and mismanagement. And since 2000, nearly 11,500 companies—representing almost 8 million employees—have been purchased by private equity firms. As their role in the economy has increased, they have come under fire from labor unions and community advocates who argue that the proliferation of leveraged buyouts destroys jobs, causes wages to stagnate, saddles otherwise healthy companies with debt, and leads to subsidies from taxpayers. Appelbaum and Batt show that private equity firms' financial strategies are designed to extract maximum value from the companies they buy and sell, often to the detriment of those companies and their employees and suppliers. Their risky decisions include buying companies and extracting dividends by loading them with high levels of debt and selling assets. These actions often lead to financial distress and a disproportionate focus on cost-cutting, outsourcing, and wage and benefit losses for workers, especially if they are unionized. Because the law views private equity firms as investors rather than employers, private equity owners are not held accountable for their actions in ways that public corporations are. And their actions are not transparent because private equity owned companies are not regulated by the Securities and Exchange Commission. Thus, any debts or costs of bankruptcy incurred fall on businesses owned by private equity and their workers, not the private equity firms that govern them. For employees this often means loss of jobs, health and pension benefits, and retirement income. Appelbaum and Batt conclude with a set of policy recommendations intended to curb the negative effects of private equity while preserving its constructive role in the economy. These include policies to improve transparency and accountability, as well as changes that would reduce the excessive use of financial engineering strategies by firms. A groundbreaking analysis of a hotly contested business model, *Private Equity at Work* provides an unprecedented analysis of the little-understood inner workings of private equity and of the effects of leveraged buyouts on American companies and workers. This important new work will be a valuable resource for scholars, policymakers, and the informed public alike.

Designing and Implementing IP/MPLS-Based Ethernet Layer 2 VPN Services Jul 01 2022 A guide to designing and implementing VPLS services over an IP/MPLS switched service provider backbone Today's communication providers are looking for convenience, simplicity, and flexible bandwidth across wide area networks—but with the quality of service and control that is critical for business networking applications like video, voice and data. Carrier Ethernet

VPN services based on VPLS makes this a reality. Virtual Private LAN Service (VPLS) is a pseudowire (PW) based, multipoint-to-multipoint layer 2 Ethernet VPN service provided by services providers. By deploying a VPLS service to customers, the operator can focus on providing high throughput, highly available Ethernet bridging services and leave the layer 3 routing decision up to the customer. Virtual Private LAN Services (VPLS) is quickly becoming the number one choice for many enterprises and service providers to deploy data communication networks. Alcatel-Lucent VPLS solution enables service providers to offer enterprise customers the operational cost benefits of Ethernet with the predictable QoS characteristics of MPLS. Comparative Law Yearbook of International Business Volume 43 Aug 02 2022 The Comparative Law Yearbook of International Business, published under the auspices of the Center for International Legal Studies, in this 43rd volume spans an arc of timely and challenging concerns for business law practitioners and academics alike. It discusses: how arbitrability of intellectual property rights disputes might improve worldwide IPR enforcement; how the "disregard of legal entity" may be used to establish implied consent by a person or entity that is not a signatory to an arbitration agreement; how an effective cross-border insolvency framework under the Indian insolvency and bankruptcy code can borrow from the UNCITRAL Model Law's and other jurisdictions' approaches to the tension between "universality" and "territoriality"; how a promising new mediation act for Pakistan may help resolve a backlog of millions of cases in a jurisdiction with a patchwork of traditional and modern alternative dispute resolution mechanisms; how the European Union seeks to balance the taxation of digital services; how Brazil is addressing the taxation of offshore indirect transfers; how private equity capital structures in the unique market of professional sports create opportunities as well as risks; how Securities Market Regulation theory plays a role in the organization and development of active securities markets, particularly in emerging markets; and how non-signatories can be bound by arbitration agreements in Brazil through "disregard of legal entity" to ascertain implied consent. The authors are practitioners and academics from Brazil, England, France, India, Pakistan, Singapore, the United States and Uzbekistan. They offer a broad and diverse perspective on some of today's pressing business law issues in a shrinking world.

Harvard Law Review: Volume 130, Number 2 - December 2016 Jun 19 2021 The Harvard Law Review's December 2016 issue, Number 2, features these contents: • Article, "Constitutionally Forbidden Legislative Intent," by Richard H. Fallon, Jr. • Article, "Deal Process Design in Management Buyouts," by Guhan Subramanian • Book Review, "Law and Moral Dilemmas," by Bert I. Huang • Note, "Charming Betsy and the Intellectual Property Provisions of Trade

Agreements" • Note, "Political Questions, Public Rights, and Sovereign Immunity" Furthermore, student commentary analyzes Recent Cases on equitable relief from a foreign judgment under RICO, mootness after a 2014 Missouri election, compelling an Internet Service Provider to produce data stored overseas, immunity for failure-to-warn claims under the Communications Decency Act, whether the federal cannabis prohibition is a "substantial burden" under the Religious Freedom Restoration Act, reasonableness of sentencing under the Guidelines after using a jury poll, and whether two-way video testimony violates the Confrontation Clause of the U.S. Constitution's Sixth Amendment. Finally, the issue includes several brief comments on Recent Publications. The Harvard Law Review is offered in a quality digital edition, featuring active Contents, linked footnotes, active URLs, legible tables, and proper ebook and Bluebook formatting. Student editors make all editorial and organizational decisions. This is the second issue of academic year 2016-2017.

Uberworked and Underpaid Jun 27 2019 This book is about the rise of digital labor. Companies like Uber and Amazon Mechanical Turk promise autonomy, choice, and flexibility. One of network culture's toughest critics, Trebor Scholz chronicles the work of workers in the "sharing economy," and the free labor on sites like Facebook, to take these myths apart. In this rich, accessible, and provocative book, Scholz exposes the uncaring reality of contingent digital work, which is thriving at the expense of employment and worker rights. The book is meant to inspire readers to join the growing number of worker-owned "platform cooperatives," rethink unions, and build a better future of work. A call to action, loud and clear, Uberworked and Underpaid shows that it is time to stop wage theft and "crowd fleecing," rethink wealth distribution, and address the urgent question of how digital labor should be regulated and how workers from Berlin, Barcelona, Seattle, and São Paulo can act in solidarity to defend their rights.

Conspiracy Oct 24 2021 An NPR Book Concierge Best Book of 2018! A Sunday Times of London Pick of the Paperbacks A stunning story about how power works in the modern age--the book the New York Times called "one helluva page-turner" and The Sunday Times of London celebrated as "riveting...an astonishing modern media conspiracy that is a fantastic read." Pick up the book everyone is talking about. In 2007, a short blogpost on Valleywag, the Silicon Valley-vertical of Gawker Media, outed PayPal founder and billionaire investor Peter Thiel as gay. Thiel's sexuality had been known to close friends and family, but he didn't consider himself a public figure, and believed the information was private. This post would be the casus belli for a meticulously plotted conspiracy that would end nearly a decade later with a \$140 million dollar judgment against Gawker, its bankruptcy and with Nick Denton, Gawker's CEO and founder, out of a job. Only later would the world learn that Gawker's demise was not incidental--it had been masterminded by Thiel. For years, Thiel had searched endlessly for a solution to what he'd come to call the "Gawker Problem." When an unmarked envelope delivered an illegally recorded sex tape of Hogan with his best friend's wife, Gawker had seen the chance for millions of pageviews and to say the things that others were afraid to say. Thiel saw their publication of the tape as the opportunity he was looking for. He would come to pit Hogan against Gawker in a multi-year proxy war through the Florida legal system, while Gawker remained confidently convinced they would prevail as they had over so many other lawsuit--until it was too late. The verdict would stun the world and so would Peter's ultimate unmasking as the man who had set it all in motion. Why had he done this? How had no one discovered it? What would this mean--for the First Amendment? For privacy? For culture? In Holiday's masterful telling of this nearly unbelievable conspiracy, informed by interviews with all the key players, this case transcends the narrative of how one billionaire took down a media empire or the current state of the free press. It's a study in power, strategy, and one of the most wildly ambitious--and successful--secret plots in recent memory. Some will cheer Gawker's destruction and others will lament it, but after reading these pages--and seeing the access the author was given--no one will deny that there is something ruthless and brilliant about Peter Thiel's shocking attempt to shake up the world.

Remediating Region May 07 2020 Rather than a media history of the region or a history of southern media, Remediating Region: New Media and the U.S. South formulates a critical methodology for studying the continuous reinventions of regional space across media platforms. This innovative collection demonstrates that structures of media undergird American regionalism through the representation of a given geography's peoples, places, and ideologies. It also outlines how the region answers back to the national media by circulating ever-shifting ideas of place via new platforms that allow for self-representation outside previously sanctioned media forms. Remediating Region recognizes that all media was once new media. In examining how changes in information and media modify concepts of region, it both articulates the virtual realities of the twenty-first-century U.S. South and historicizes the impact of "new" media on a region that has long been mediated. Eleven essays examine media moments ranging from the nineteenth century to the present day, among them Frederick Douglass's utilization of early photography, video game representations of a late capitalist landscape, rural queer communities' engagement with social media platforms, and contemporary technologies focused on revitalizing Indigenous cultural practices. Interdisciplinary in scope and execution, Remediating Region argues that on an increasingly networked planet, concerns over the mediated region continue to inform how audiences and participants understand their entrée into a global world through local space.

Birthing Techno-Sapiens Oct 31 2019 This ground-breaking book challenges us to re-think ourselves as techno-sapiens—a new species we are creating as we continually co-evolve ourselves with our technologies. While some of

its chapters are imaginary, they are all empirically grounded in ethnography and richly theorized from diverse disciplines. The authors go far beyond a techno-optimism vs. techno-pessimism stance, stretching our thinking about birthing techno-sapiens to consider not only how our cyborgian reproductive lives are constrained and/or enabled by technology but are also about emotions and spirit. The world of reproductive health care and particularly that of genetic engineering is developing exponentially, and current challenges are vastly different from those of a decade ago. The book is provocative, intended to generate debate, ideas, and future research and to influence ethical policy and practice in human techno-reproduction. It will be of interest across the social sciences and humanities, for reproductive scholars, bioethicists, techno-scientists, and those involved in the development and delivery of maternity services.
